**Programming in Java** Sachin Malhotra, Saurabh Choudhary, 2014      *The Mathematical-Function Computation Handbook* Nelson H.F. Beebe, 2017-08-20 This highly comprehensive handbook provides a substantial advance in the computation of elementary and special functions of mathematics extending the function coverage of major programming languages well beyond their international standards including full support for decimal floating point arithmetic. Written with clarity and focusing on the C language the work pays extensive attention to little understood aspects of floating point and integer arithmetic and to software portability as well as to important historical architectures. It extends support to a future 256 bit floating point format offering 70 decimal digits of precision. Select Topics and Features references an exceptionally useful author maintained MathCW website containing source code for the book's software compiled libraries for numerous systems pre built C compilers and other related materials offers a unique approach to covering mathematical function computation using decimal arithmetic provides extremely versatile appendices for interfaces to numerous other languages Ada C C Fortran Java and Pascal presupposes only basic familiarity with computer programming in a common language as well as early level algebra supplies a library that readily adapts for existing scripting languages with minimal effort supports both binary and decimal arithmetic in up to 10 different floating point formats covers a significant portion with highly accurate implementations of the U S National Institute of Standards and Technology's 10 year project to codify mathematical functions. This highly practical text reference is an invaluable tool for advanced undergraduates recording many lessons of the intermingled history of computer hardware and software numerical algorithms and mathematics. In addition professional numerical analysts and others will find the handbook of real interest and utility because it builds on research by the mathematical software community over the last four decades      [Network Coding](#) Muriel Medard, Alex Sprintson, 2012 Introduction Network coding Fundamentals Harnessing Network Coding in Wireless Systems Network Coding for Content Distribution and Multimedia Streaming in Peer to Peer Networks Network Coding in the Real World Network Coding and User Cooperation for Streaming and Download Services in LTE Networks CONCERTO Experiences with a Real World MANET System Based on Network Coding Secure Network Coding Bounds and Algorithms for Secret and Reliable Communications Network Coding and Data Compression Scaling Laws with Network Coding Network Coding in Disruption Tolerant Networks      *Interactive Object Oriented Programming in Java* Vaskaran Sarcar, 2016-12-19 Discover object oriented programming with Java in this unique tutorial.
