the chance you'd probably rewrite all of your existing code in the newer managed code environment that .NET provides. But it is difficult or impossible to throw out all existing legacy code and start over when a new technology arrives. Instead, you need to find a way to move forward with new .NET development while reusing existing pieces of tested, working code. You need a way to interoperate with the existing code until you have a chance to finally rewrite all of it in .NET. The only recipe style book on the subject, *NET 2.0 Interoperability Recipes: A Problem Solution Approach*, guides Windows developers who are transitioning from native Windows code to .NET managed code. .NET tools will allow you to interoperate with existing code. But finding the appropriate tool for the task at hand can sometimes be a frustrating experience. So this book will guide you past myriad infrequently used interop options to focus on those you'll use most often.

[Python Cookbook](#) Alex Martelli, David Ascher, 2002. The Python Cookbook is a collection of problems, solutions, and practical examples for Python programmers written by Python programmers. Over the past year, members of the Python community have contributed material to an online repository of Python recipes hosted by ActiveState. This book contains the best of those recipes accompanied by overviews and background material by key Python figures. The recipes in the Python Cookbook range from simple tasks such as working with dictionaries and list comprehensions to entire modules that demonstrate templating systems and network monitoring. This book contains over 200 recipes on the following topics: Searching and sorting, Manipulating text, Working with files and the filesystem, Object oriented programming, Dealing with threads and processes, System administration, Interacting with databases, Creating user interfaces, Network and web programming, Processing XML, Distributed programming, Debugging and testing, Extending Python. This book is a treasure trove of useful code for all Python programmers, from novices to advanced practitioners, with contributions from such Python luminaries as Guido van Rossum, David Ascher, Tim Peters, Paul Prescod, Mark Hammond, and Alex Martelli, as well as over 100 other Python programmers. The recipes highlight Python best practices and can be used directly in day-to-day programming tasks as a source of ideas or as a way to learn more about Python. The recipes in the Python Cookbook were edited by David Ascher, who is on the board of the Python Software Foundation and is the co-author of *Learning Python*, and Alex Martelli, who is known for his numerous and exhaustive postings on the Python mailing list. The book contains a foreword by Guido van Rossum, the creator of Python.
