The Logic of Gilles Deleuze Corry Shores, 2020-10-15 French philosopher Gilles Deleuze wrote two logic books Francis Bacon *The Logic of Sensation* and *The Logic of Sense* However in neither of these books nor in any other works does Deleuze articulate in a formal way the features of the logic he employs He certainly does not use classical logic And the best options for the non classical logic that he may be implementing are fuzzy intuitionist and many valued These are applicable to his concepts of heterogeneous composition and becoming affirmative synthetic disjunction and powers of the false In *The Logic of Gilles Deleuze Basic Principles* Corry Shores examines the applicability of three non classical logics to Deleuze s philosophy by building from the philosophical and logical writings of Graham Priest the world s leading proponent of dialetheism Through so doing Shores argues that Deleuze s logic is best understood as a dialetheic paraconsistent many valued logic

Philosophical Explorations of New and Alternative Religious Movements Morgan Luck, 2016-04-22 Philosophy of religion is focused chiefly on theism Yet there are a growing number of new and alternative religious movements that would also benefit from philosophical scrutiny This book is the first collection of philosophical essays by a team of international authors focusing on new and alternative religious movements The book begins with an examination of the definition of new religious movements before offering an introduction to and an analysis of core beliefs held by particular movements including Scientology Raelianism Siddha Yoga the Arica School the Church of the Latter Day Saints Mormonism Pantheism Digital Theology New Atheism and the Word of Faith movement Contributors offer an analysis of one or more of the core tenets of the religious movement providing readers with both an insight into the group and the methodology of philosophy of religion

If A, Then B Michael Shenefelt, Heidi White, 2013-06-11 While logical principles seem timeless placeless and eternal their discovery is a story of personal accidents political tragedies and broad social change *If A Then B* begins with logic s emergence twenty three centuries ago and tracks its expansion as a discipline ever since It explores where our sense of logic comes from and what it really is a sense of It also explains what drove human beings to start studying logic in the first place Logic is more than the work of logicians alone Its discoveries have survived only because logicians have also been able to find a willing audience and audiences are a

consequence of social forces affecting large numbers of people quite apart from individual will This study therefore treats politics economics technology and geography as fundamental factors in generating an audience for logic grounding the discipline s abstract principles in a compelling material narrative The authors explain the turbulent times of the enigmatic Aristotle the ancient Stoic Chrysippus the medieval theologian Peter Abelard and the modern thinkers Ren Descartes David Hume Jeremy Bentham George Boole Augustus De Morgan John Stuart Mill Gottlob Frege Bertrand Russell and Alan Turing Examining a variety of mysteries such as why so many branches of logic syllogistic Stoic inductive and symbolic have arisen only in particular places and periods *If A Then B* is the first book to situate the history of logic within the movements of a larger social world *If A Then B* is the 2013 Gold Medal winner of Foreword Reviews IndieFab Book of the Year Award for Philosophy **Relevant Logic** Edwin D. Mares,2004-02-26 This book introduces the reader to relevant logic and provides it with a philosophical interpretation The defining feature of relevant logic is that it forces the premises of an argument to be really used relevant in deriving its conclusion The logic is placed in the context of possible world semantics and situation semantics which are then applied to provide an understanding of the various logical particles especially implication and negation and natural language conditionals The book ends by examining various applications of relevant logic and presenting some interesting open problems **Anselm's Argument** Brian Leftow,2022 Anselm of Canterbury gave the first ontological argument for God s existence as necessary Yet philosophers have mostly neglected to examine what modal concepts he uses and what their metaphysical basis is Brian Leftow sets out Anselm s modal metaphysics and defends all but one premise of Anselm s best argument for God s existence *Many-Valued Aesthetics* Hauke Ohls,2024-08-02 Yes No Perhaps are the most written words in Mary Bauermeister s artworks Together they stand for the concept of many valued aesthetics in the German artist s oeuvre an aesthetic that Bauermeister developed using many valued logic Hauke Ohls brings the artist s central groups of works in context with each other as well as with the neo avant garde of the post war period in Europe and the USA He shows that the development of Bauermeister s art may appear disparate but her canvas and relief works drawings and writing pictures lens boxes and stone pictures are characterized by a reciprocal relationship of combinations and interconnections Through the ubiquitous use of meta references the entire oeuvre ultimately appears as an interconnected assemblage **Studyguide for an Introduction to Non-Classical Logic** Cram101 Textbook Reviews,2013-05 Never HIGHLIGHT a Book Again Virtually all testable terms concepts persons places and events are included Cram101 Textbook Outlines gives all of the outlines highlights notes for your textbook with optional online practice tests Only Cram101 Outlines are Textbook Specific Cram101 is NOT the Textbook Accompanys 9780521673761 **The Bulletin of Symbolic Logic** ,2008 *Logique et analyse* ,2019 **Outlines and Highlights for an Introduction to Non-Classical Logic** Cram101 Textbook Reviews,2011-05-01 Never HIGHLIGHT a Book Again Virtually all of the testable terms concepts persons places and events from the textbook are included Cram101 Just the FACTS101 studyguides give all
