

What is a Model ?

Simplified Representation of a Real or Theoretical System at some particular point of time and space intended to provide the understanding of the system.

Whether a model is good or not depends on the extent to which it provides understanding.

What Level of Model Detail ?

All the models are simplification of reality.
Exact copy of a reality can only be the reality itself.

There is always a trade off as to what level of detail is included in the model:

- Too little detail: risk of missing relevant interactions.
- Too much detail: Overly complicated to understand
