Inspiring Mathematics: Lessons from the Navajo Nation Math Circles Dave Auckly, Bob Klein, Amanda Sereney, Tatiana Shubin, 2019-12-05 The people of the Navajo Nation know mathematics education for their children is essential. They were joined by mathematicians familiar with ways to deliver problems and a pedagogy that through exploration shows the art, joy, and beauty in mathematics. This combined effort produced a series of Navajo Math Circles interactive mathematical explorations across the Navajo Reservation. This book contains the mathematical details of that effort. Between its covers is a thematic rainbow of problem sets that were used in Math Circle sessions on the Reservation. The problem sets are good for puzzling over and exploring the mathematical ideas within. They will help nurture curiosity and confidence in students. The problems come with suggestions for pacing for adjusting the problems to be more or less challenging and for different approaches to solving them. This book is a wonderful resource for any teacher wanting to enrich the mathematical lives of students and for anyone curious about mathematical thinking outside the box. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents, and teachers and the mathematics profession.

A Moscow Math Circle Sergey Dorichenko, 2011-12-29 Moscow has a rich tradition of successful math circles to the extent that many other circles are modeled on them. This book presents materials used during the course of one year in a math circle organized by mathematics faculty at Moscow State University and also used at the mathematics magnet school known as Moscow School Number 57. Each problem set has a similar structure; it combines review material with a new topic, offering problems in a range of difficulty levels. This time-tested pattern has proved its effectiveness in engaging all students and helping them master new material while building on earlier knowledge. The introduction describes in detail how the math circles at Moscow State University are run. Dorichenko describes how the early sessions differ from later sessions, how to choose problems, and what sorts of difficulties may arise when running a circle. The book also includes a selection of problems used in the competition known as the Mathematical Maze, a mathematical story based on actual lessons with students, and an addendum on the San Jose Mathematical Circle, which is run in the Russian style. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents, and teachers and the mathematics profession.

Burago,2018-07-03 Mathematical circles with their question driven approach and emphasis on problem solving expose students to the type of mathematics that stimulates the development of logical thinking creativity analytical abilities and mathematical reasoning These skills while scarcely introduced at school are in high demand in the modern world This book a sequel to Mathematical Circle Diaries Year 1 teaches how to think and solve problems in mathematics The material distributed among twenty nine weekly lessons includes detailed lectures and discussions sets of problems with solutions and contests and games In addition the book shares some of the know how of running a mathematical circle The book covers a broad range of problem solving strategies and proofing techniques as well as some more advanced topics that go beyond the limits of a school curriculum The topics include invariants proofs by contradiction the Pigeonhole principle proofs by coloring double counting combinatorics binary numbers graph theory divisibility and remainders logic and many others When students take science and computing classes in high school and college they will be better prepared for both the foundations and advanced material The book contains everything that is needed to run a successful mathematical circle for a full year This book written by an author actively involved in teaching mathematical circles for fifteen years is intended for teachers math coaches parents and math enthusiasts who are interested in teaching math that promotes critical thinking Motivated students can work through this book on their own In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession

A Decade of the Berkeley Math Circle Zvezdelina Stankova, Tom Rike,2015-02-03 Many mathematicians have been drawn to mathematics through their experience with math circles The Berkeley Math Circle BMC started in 1998 as one of the very first math circles in the U S Over the last decade and a half 100 instructors university professors business tycoons high school teachers and more have shared their passion for mathematics by delivering over 800 BMC sessions on the UC Berkeley campus every week during the school year This second volume of the book series is based on a dozen of these sessions encompassing a variety of enticing and stimulating mathematical topics some new and some continuing from Volume I from dismantling Rubik s Cube and randomly putting it back together to solving it with the power of group theory from raising knot eating machines and letting Alexander the Great cut the Gordian Knot to breaking through knot theory via the Jones polynomial from entering a seemingly hopeless infinite raffle to becoming friendly with multiplicative functions in

the land of Dirichlet M bius and Euler from leading an army of jumping fleas in an old problem from the International Mathematical Olympiads to improving our own essay writing strategies from searching for optimal paths on a hot summer day to questioning whether Archimedes was on his way to discovering trigonometry 2000 years ago Do some of these scenarios sound bizarre having never before been associated with mathematics Mathematicians love having fun while doing serious mathematics and that love is what this book intends to share with the reader Whether at a beginner an intermediate or an advanced level anyone can find a place here to be provoked to think deeply and to be inspired to create In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession Titles in this series are co published with the Mathematical Sciences Research Institute MSRI
