

Algebra 2B - Activity 10.2

1. Based on the grid below, identify each function below as being a polynomial function. Explain.

2. Identify each of the functions below that are **not** polynomials. Explain. These are things you should know how to do now (just by looking at the function's graphability to determine if **not** a polynomial) or you should be able to do them.

This is being presented with the grid for the same reason.

3. Graph each of the functions part 2 on a coordinate plane. If that were the case, you could see the graphability of each polynomial or if it were not a polynomial is not graphable. **Graph each of them.**

Remember, the functions that are not polynomials are not graphable on a coordinate plane.
