**Item Response Theory** Ronald K. Hambleton, H. Swaminathan, 2013-11-11 In the decade of the 1970s item response theory became the dominant topic for study by measurement specialists But the genesis of item response theory IRT can be traced back to the mid thirties and early forties In fact the term Item Characteristic Curve which is one of the main IRT concepts can be attributed to Ledyard Tucker in 1946 Despite these early research efforts interest in item response theory lay dormant until the late 1960s and took a backseat to the emerging development of strong true score theory While true score theory developed rapidly and drew the attention of leading psychometricians the problems and weaknesses inherent in its formulation began to raise concerns Such problems as the lack of invariance of item parameters across examinee groups and the inadequacy of classical test procedures to detect item bias or to provide a sound basis for measurement in tailored testing gave rise to a resurgence of interest in item response theory Impetus for the development of item response theory as we now know it was provided by Frederic M Lord through his pioneering works Lord 1952 1953a 1953b The progress in the fifties was painstakingly slow due to the mathematical complexity of the topic and the nonexistence of computer programs

**Sociology of Education** James Ainsworth, 2013-04-11 The sociology of education is a rich interdisciplinary field that studies schools as their own social world as well as their place within the larger society The field draws contributions from education sociology human development family studies economics politics and public policy Sociology of Education An A to Z Guide introduces students to the social constructions of our educational systems and their many players including students and their peers teachers parents the broader community politicians and policy makers The roles of schools the social processes governing schooling and impacts on society are all critically explored Despite an abundance of textbooks and specialized monographs there are few up to date reference works in this area Features Benefits 335 signed entries fill 2 volumes in print and electronic formats providing the most comprehensive reference resource available on this topic Cross References and Suggestions for Further Reading guide readers to additional resources A thematic Reader s Guide groups related articles by broad topic areas as one handy search feature on the e Reference platform which also includes a comprehensive index of search terms facilitating ease of use by both on campus students and distance learners A Chronology provides students with historical perspective on the sociology of education

**Students at Risk of School Failure** José Jesús Gázquez, José Carlos Núñez, 2018-10-18 The main objective of this Research Topic is to determine the conditions that place students at risk of school failure identifying student and context variables In spite of the fact that there is currently little doubt about how one learns and how to teach in some countries of the developed world there is still there is a high rate of school failure Although the term school failure is a very complex construct insofar as its causes consequences and development from the field of educational psychology the construct student engagement has recently gained special interest in an attempt to deal with the serious problem of school failure School engagement builds on the anatomy of the students

involvement in school and describes their feelings behaviors and thoughts about their school experiences So engagement is an important component of students school experience with a close relationship to achievement and school failure Children who self set academic goals attend school regularly and on time behave well in class complete their homework and study at home are likely to interact adequately with the school social and physical environments and perform well in school In contrast children who miss school are more likely to display disruptive behaviors in class miss homework frequently exhibit violent behaviors on the playground fail subjects be retained and if the behaviors persist quit school Moreover engagement should also be considered as an important school outcome eliciting more or less supportive reactions from educators For example children who display school engaged behaviors are likely to receive motivational and instructional support from their teachers The opposite may also be true But what makes student engage more or less The relevant literature indicates that personal variables e g sensory motor neurodevelopmental cognitive motivational emotional behavior problems learning difficulties addictions social and or cultural variables e g negative family conditions child abuse cultural deprivation ethnic conditions immigration or school variables e g coexistence at school bullying cyberbullying may concurrently hinder engagement preventing the student from acquiring the learnings in the same conditions as the rest of the classmates
