Korzun,2022-12-15 Applied mathematics together with modeling and computer simulation is central to engineering and computer science and remains intrinsically important in all aspects of modern technology This book presents the proceedings of AMMCS 2022 the 2nd International Conference on Applied Mathematics Modeling and Computer Simulation held in Wuhan China on 13 and 14 August 2022 with online presentations available for those not able to attend in person due to continuing pandemic restrictions The conference served as an open forum for the sharing and spreading of the newest ideas and latest research findings among all those involved in any aspect of applied mathematics modeling and computer simulation and offered an ideal platform for bringing together researchers practitioners scholars professors and engineers from all around the world to exchange the newest research results and stimulate scientific innovation More than 150 participants were able to exchange knowledge and discuss the latest developments at the conference The book contains 127 peer reviewed papers selected from more than 200 submissions and ranging from the theoretical and conceptual to the strongly pragmatic all addressing industrial best practice Topics covered included mathematical modeling and application engineering applications and scientific computations and simulation of intelligent systems The book shares practical experiences and enlightening ideas and will be of interest to researchers and practitioners in applied mathematics modeling and computer simulation everywhere Basic Health Physics Joseph John Bevelacqua,1999 Radiation litigation the cleanup and decommissioning of nuclear facilities radon exposure nuclear medicine food irradiation stricter regulatory climate these are some of the reasons health physics and radiation protection professionals are increasingly called upon to upgrade their skills Designed to prepare candidates for the American Board of Health Physics Comprehensive examination Part I and other certification examinations Basic Health Physics Problems and Solutions introduces professionals in the field to radiation protection principles and their practical application in routine and emergency situations It features more than 650 worked examples illustrating concepts under discussion along with an in depth coverage of sources of radiation standards and regulations biological effects of ionizing radiation instrumentation external and internal dosimetry counting statistics monitoring and interpretations operational health physics transportation and waste nuclear emergencies and more Reflecting for the first time the true scope of health physics at an introductory level Basic Health Physics Problems and Solutions gives readers the tools to properly evaluate challenging situations in all areas of radiation protection including the medical university power reactor fuel cycle research reactor environmental non ionizing radiation and accelerator health physics **Contemporary Health Physics** Joseph John Bevelacqua,2009-03-09

This is the first text specifically designed to train potential health physicists to think and respond like professionals. Written by a former chairman of the American Board of Health Physics Comprehensive Panel of Examiners with more than 20 years of professional and academic experience in the field, it offers a balanced presentation of all the theoretical and practical issues essential for a full working knowledge of radiation exposure assessments. As the only book to cover the entire radiation protection field, it includes detailed coverage of the medical, university, reactor, fuel cycle, environmental, and accelerator areas while exploring key topics in radiation basics, external and internal dosimetry, the biological effects of ionizing radiation, and much more. Besides, backed by more than 500 worked examples developed within the context of various scenarios and spanning the full spectrum of real world challenges, it quickly instills in readers the professional acumen and practical skills they need to perform accurate radiation assessments in virtually any routine or emergency situation. The result is a valuable resource for upper level students and anyone preparing to take the American Board of Health Physics Comprehensive Examination as well as for professionals seeking to expand their scope and sharpen their skills.

Modeling and Simulation of Aerospace Vehicle Dynamics Peter H. Zipfel, 2000 A textbook for an advanced undergraduate course in which Zipfel, aerospace engineering U of Florida introduces the fundamentals of an approach to or step in design that has become a field in and of itself. The first part assumes an introductory course in dynamics and the second some specialized knowledge in subsystem technologies. Practicing engineers in the aerospace industry he suggests should be able to cover the material without a tutor. Rather than include a disk, he has made supplementary material available on the Internet. Annotation copyrighted by Book News Inc, Portland, OR
