Swarm, Evolutionary, and Memetic Computing Bijaya Ketan Panigrahi, Swagatam Das, Ponnuthurai Nagarathnam Suganthan, Pradipta Kumar Nanda, 2012-12-16 This book constitutes the refereed proceedings of the Third International Conference on Swarm Evolutionary and Memetic Computing SEMCCO 2012 held in Bhubaneswar India in December 2012. The 96 revised full papers presented were carefully reviewed and selected from 310 initial submissions. The papers cover a wide range of topics in swarm evolutionary memetic and other intelligent computing algorithms and their real world applications in problems selected from diverse domains of science and engineering. Optimization of Oscillation Parameters in Continuous Casting Process of Steel Manufacturing: Genetic Algorithms Versus Differential Evolution Arya K. Bhattacharya, Debjani Sambasivam, 2009 The relationships between oscillation performance metrics like lubrication oscillation mark depth and peak friction and the design parameter set consisting of stroke s frequency f and deviation from sinusoidal waveform are expressed in a mathematical framework. This enables the definition of explicit objective functions and constraints that are used to drive a Genetic Algorithm towards the best performing parameter set across the entire range of casting speed. Comparison with parameter sets provided by OEM and implemented currently shows that the synthesized set provides much better lubrication, the prime objective of oscillating the mold while also reducing oscillation marks and peak friction. Furthermore, this is achieved with only minor variation of the parameters across the speed range. Substitution of a Genetic Algorithm by a Differential Evolution algorithm for the above synthesis generates exactly identical results from the engineering domain perspective but with a convergence rate that is faster by at least one order of magnitude. The reasons for this are analyzed leading to a conclusion that for small dimensioned problems DE is definitely a better approach but for larger dimensioned ones it is advisable to use GA in the initial phases and switch to DE at a later stage as the approach to global optimum becomes asymptotic. **TMS 2025 154th Annual Meeting & Exhibition Supplemental Proceedings** Minerals, Metals & Materials Society, 2025-03-02 This collection presents papers from the 154th Annual Meeting Exhibition of The Minerals Metals Materials Society.
