## **Barro Growth Solutions:**

*Union Wage Bargaining and Economic Growth* Jörg LINGENS, 2012-09-03 Writing a book is not possible without the generous input of many people. It is a pleasure to have the opportunity to thank at least some of these people. Prof. Dr. Jochen Michaelis, the supervisor of my dissertation, taught me how to do economic analysis and initiated my interest in the labour market. Discussions with him have always been enlightening and have greatly improved the analysis in this book. Moreover, he always encouraged me when I experienced a slump in my motivation. He never lost his calmness and good temper, not even in situations when my need for discussion must have been bothering him. Thanks for that, Jochen. I am indebted to Prof. Dr. Peter Weise for taking over the job as the second referee of my thesis. He gave very valuable comments and sacrificed his Christmas holiday to write the referee report as fast as possible. I also want to thank Prof. Stefan Voigt and Prof. Dr. Reinhold Kosfeld, the other two members of the dissertation committee, for the discussion during the defence of the thesis.

**The 4% Solution** The Bush Institute, 2012-07-17 Foreword by President George W. Bush. With contributions from world-renowned economists and Nobel prizewinners. The 4% Solution is a blueprint for restoring America's economic health. The United States is reaching a pivotal point in its economic history. Millions of Americans owe more on their homes than they are worth. Long-term unemployment is alarmingly high, and the Congressional Budget Office is projecting a sustainable growth rate of only 2.3%, a full percentage point below the average for the past sixty years. Unless a turnaround comes quickly, the United States could be mired in debt for years to come, and millions of Americans will be pushed to the sidelines of the economy. The 4% Solution offers clear and unflinching ideas on how to revive America's economy. It sets a positive economic goal and asks some of the top economic minds on how to achieve it. With a focus on removing government constraints, the 4% Solution defines the policies that will allow Americans to save, invest, and create the jobs that the United States needs. The 4% Solution draws on the best minds in the business, including five Nobel laureates: Robert E. Lucas Jr. on the history and future of economic growth; Gary S. Becker on why we need immigrants in order to grow; Edward Prescott on the cost to growth of the welfare state; Vernon Smith on why housing leads us into and out of recessions; Myron Scholes on why we need to innovate in order to grow the economy.

**Economic Growth** Alfonso Novales, Esther Fernández, Jesús Ruiz, 2014-07-02 This is a book on deterministic and stochastic Growth Theory and the computational methods needed to produce numerical solutions. Exogenous and endogenous growth models are thoroughly reviewed. Special attention is paid to the use of these models for fiscal and monetary policy analysis. Modern Business Cycle Theory, the New Keynesian Macroeconomics, the class of Dynamic Stochastic General Equilibrium models can be all considered as special cases of models of economic growth, and they can be analyzed by the theoretical and numerical procedures provided in the textbook. Analytical discussions are presented in full detail. The book is self-contained and is designed so that the student advances in the theoretical and the computational issues in parallel. EXCEL and Matlab files are provided on an accompanying website. See Preface to the Second Edition to

illustrate theoretical results as well as to simulate the effects of economic policy interventions The structure of these program files is described in Numerical exercise type of sections where the output of these programs is also interpreted The second edition corrects a few typographical errors and improves some notation

**The Elements and Dynamic Systems of Economic Growth and Trade Models** Bjarne S. Jensen, 2025-04-15 This updated and expanded book examines the fundamentals of economic growth models as expressed by dynamic systems of nonlinear differential equations With homogeneous dynamic systems as the unifying mathematical framework the time paths and long run stability properties of the solutions to classical neoclassical and modern macroeconomic growth models are analyzed The general structure and solutions of two sector and multi sector growth models are also explored with special attention given to the evolution of output compositions and sectoral factor allocations involved in Walrasian general equilibrium dynamics Ramsey optimal growth saving models with variable intertemporal substitution non homothetic utility are discussed to demonstrate the ability to generate a realistic historically observed evolution of economic per capita growth rates and saving rates The book aims to highlight how basic economic growth models can be extended widely including international trading economies world market prices commodity trade patterns and issues related to globalization migrations and international factor movements It will be relevant to students and researchers interested in economic growth and trade policy

**Fiscal and Monetary Policy** Thomas Mayer, Steven M. Sheffrin, 1995 This two volume set reprints 28 papers on fiscal and monetary policy interpreted broadly enough to include such issues as the effects of government debt and intergenerational accounting The publication is divided into three parts the first deals with the problems that are common to both fiscal and monetary policies the second deals with fiscal policy and the third with monetary policy

**Disequilibrium Growth Theory** Charles van Marrewijk, Jos Verbeek, 1993 Static disequilibrium economic theory fails to analyse the dynamic effects of market disequilibrium whereas standard growth theory always assumes markets to be in equilibrium Both shortcomings can be overcome by disequilibrium growth theory A problem arises however because different short term disequilibrium regimes give rise to differential equations The dynamic analysis therefore has to take into consideration the possibility of regime switching Various solutions have been put forward for this problem but they generally do not give unique solutions The method developed by Filippov gives a unique solution that coincides with the classical solution to differential equations in the interior of the regimes This approach has been used in several papers in the past decade This book seeks to fill the gap in the literature on what has been achieved so far

**Trade, Growth, and Economic Policy in Open Economies** Karl-Josef Koch, Klaus Jaeger, 2012-12-06 Part 1 of this volume focusses on globalization Gains from trade international competitiveness labour market issues in open economies customs unions dumping and intra firm trade are the topics of this part Part 2 puts a stronger emphasis on dynamic economics Social income intergenerational transfers public pension systems and bequest and gift motives in overlapping generation models are main topics Economic policies are analyzed in Part 3 including the relation between wage

rigidity and migration several aspects of German financial and monetary policy as well as tax competition The volume concludes with institutional issues of globalization a western view on eastern transition social cost of rent seeking and the evolution of social institutions *Determinants of Growth (General) and Regional Growth, Theory and Evidence* Marco Alexander Caiza Andresen, 2007-07 Seminar paper from the year 2006 in the subject Economics Economic Cycle and Growth grade 1 7 University of Paderborn Faculty of Economics Business Administration and Business Computing course Research and Independent Studies in International Economics 71 entries in the bibliography language English abstract The aim of this term paper is to find out what causes economic growth through analyzing determinants of growth in general and of regional growth both in theory and evidence The question why some countries grow significantly slower than others has been discussed intensively over the last decades By thorough study of literature the main determinants will be indicated and similarities and differences between general and regional growth become visible After a short introduction in the second chapter the main growth determinants will be presented individually for the general and the regional area each time also an introduction to the extensive literature theory and empirics of the specific area will be given beforehand In the last chapter a conclusion will be drawn and an answer given to the question on which are the key determinants by comparing them with each other and in how far the results do distinguish on general and regional level

**Optimal Taxation of Human and Physical Capital in Endogenous Growth Models** Nouriel Roubini, Gian Maria Milesi-Ferretti, 1994

**Economic Growth and Environmental Policy** Frank Hettich, 2000 Focusing on the effects of environmental policy in closed and open economies in the short medium and long term this book uses dynamic modelling to study the interactions between economic growth environmental policy and tax reform

**The Scientist**, 1981 Transitional Growth Paths in Developing Economies Peter E. Robertson, 1997 Recent Developments in Growth Theory Daron Acemoglu, 2004 *Southern Economic Journal*, 1927 *Computationally Efficient Solution and Maximum Likelihood Estimation of Nonlinear Rational Expectation Models* Jeffrey C. Fuhrer, Crawford Hoyt Bleakley, 1996

**Lecture Notes on Economic Growth (II)** Xavier Sala-i-Martin, 1990 This paper explores the five simplest models of endogenous growth We start with the AK model Rebelo 1990 and argue that all endogenous growth models can be viewed as variations or microfoundations of it We then examine the Barro 1990 model of government spending and growth Next we look at the Arrow Sheshinskj Romer model of learning by doing and externalities The Lucas 1988 model of human capital accumulation is then considered Finally we present a simple model of R D and growth

*Fair Growth* Nancy Birdsall, Augusto de la Torre, Rachel Menezes, 2008 Presents tools to make life in Latin America more equitable and fair for the majority Suggests policies and programs for making tax structures more progressive giving small businesses a chance protecting labor mobility and workers rights tackling corruption and raising levels of quality efficiency and equity of the education systems Provided by publisher
