**Beginning and Intermediate Algebra**, 2016 Beginning and Intermediate Algebra Molly O'Neill, Julie Miller, Nancy Hyde, 2007 Built by teachers just like you Miller O Neill continues to offer an enlightened approach grounded in the fundamentals of classroom experience in Beginning and Intermediate 2e The practice of many instructors in the classroom is to present examples and have their students solve similar problems This is realized through the Skill Practice Exercises that directly follow the examples in the textbook Throughout the text the authors have integrated many Study Tips and Avoiding Mistakes hints which are reflective of the comments and instruction presented to students in the classroom In this way the text

communicates to students the very points their instructors are likely to make during lecture helping to reinforce the concepts and provide instruction that leads students to mastery and success The authors included in this edition Problem Recognition exercises that many instructors will likely identify to be similar to worksheets they have personally developed for distribution to students The intent of the Problem Recognition exercises is to help students overcome what is sometimes a natural inclination toward applying problem solving algorithms that may not always be appropriate In addition the exercise sets have been revised to include even more core exercises than were present in the first edition This permits instructors to choose from a wealth of problems allowing ample opportunity for students to practice what they learn in lecture to hone their skills and develop the knowledge they need to make a successful transition into College Algebra In this way the book perfectly complements any learning platform whether traditional lecture or distance learning its instruction is so reflective of what comes from lecture that students will feel as comfortable outside of class as they do inside class with their instructor For even more support students have access to a wealth of supplements including McGraw Hill s online homework management system MathZone
