**Shifts towards Image-centricity in Contemporary Multimodal Practices** Hartmut Stöckl, Helen Caple, Jana Pflaeging, 2020-01-03. This innovative collection builds on current multimodal research to showcase image-centric practices in contemporary media, unpacking the increasing extent to which the visual plays a principal role in modern-day communication. The volume begins by providing a concise overview of the history and development of multimodal research with respect to image-centricity, with successive chapters looking at how image-centricity emerges over time, unfolds in relation to language and other features in global design strategies. Bringing together contributions from both established and emerging researchers in multimodality and social semiotics, the book presents case studies on a variety of image-centric genres and domains, including magazines, advertising, discourse, multimedia, storytelling, and social media platforms. The aims of the book are to interrogate the new multimodal genres, relations, forms of analysis, and methods of production that emerge from a greater reliance on visual components. Refining and broadening current understandings of image-centricity in today's media sphere, this collection will be of particular interest to scholars and students in multimodality, social semiotics, applied linguistics, language and media, and discourse analysis.

As the Two-Nation Theory culminated in the creation of Pakistan, the same also became the ideology of the state for the purpose of legitimising political authority. However, religion-based national identity could not cement the diverse socio-cultural entities of Pakistan. The myth of cohesive Islamic nationhood was exploded with the creation of Bangladesh in 1971. Although Pakistan has managed to survive as a nation-state, aspiring multiple identities continue to pose threats to its mono-religious national identity. In the face of contesting multiple identities, the domination of Punjab and Punjabis still remains a defining core along with the Islamic identity.
