The Strong Potential of Augmented Reality for Experiential Marketing Simon Hörtreiter,2020-08-05 Bachelor Thesis from the year 2020 in the subject Communications Public Relations Advertising Marketing Social Media grade 1 0 University of Applied Sciences Landshut language English abstract As traditional marketing approaches are losing their effectiveness brands have recently started to apply augmented reality AR for staging powerful brand experiences that will differentiate them from competition However despite proving an innovative way to captivate consumers attention research within the field of AR brand experiences has been relatively scarce resulting in reluctant adoption as marketers are unaware of the technology s direct brand related outcomes Since several scholars indicate a possible connection between AR brand experiences and consumer brand relationships this thesis aims to extend the scarce literature and subsequently further entice adoption by examining the impact of AR brand experiences on consumer brand relationships This study applied a mixed method research approach consisting of a survey as the predominant method to assess the hypotheses as well as expert interviews to validate the quantitative results and gain further in depth insights The questionnaire sampled millennial consumers in Germany who

recently encountered an AR brand experience Overall quantitative data analysis included exploratory factor analysis and multiple regression analysis for hypotheses testing while a thematic analysis was applied on the gathered qualitative data The results of this thesis demonstrate that AR brand experiences have a positive impact on consumer brand relationships Furthermore the key relationship drivers of AR were identified as sensory experiences incorporated through visualization and immersion affective experience staged by storytelling and co creation as well as behavioral experiences crafted through location based AR This thesis contributes further knowledge to the augmented reality marketing literature consumer brand relationship literature and experiential marketing literature as well as suggests directions for future research Moreover the findings of this research facilitate marketers endeavors to successfully develop AR brand experiences that foster consumer brand relationships
