Introduction to Global Health Kathryn H. Jacobsen, 2007-10-05

**Introduction to Global Health** Kathryn H.

Jacobsen, 2022-10-10 Introduction to Global Health is a comprehensive look at today's most critical global health concerns and the actions that people around the world are taking to solve public health problems and to promote health and wellbeing. The Fourth Edition of Introduction to Global Health maintains the clarity and ease of use of the prior edition while featuring a greater emphasis on the specific interventions that are being implemented to promote longer healthier lives worldwide and prevent disease disability and early death in countries of all income levels. Every chapter balances material about pandemics, climate change and other emerging threats to global public health with evidence of how global health interventions are enabling progress toward achieving health equity. Chapters on globalization and health security, the socioeconomic and environmental contributors to population health, ethics and human rights, health systems financing and global health agencies and organizations closely align with the Student Learning Objectives recommended by the Consortium of Universities for Global Health (CUGH). Updated science, policy, epidemiology and data visualizations are featured in the chapters on infectious diseases, reproductive health, nutrition, noncommunicable diseases, mental health, promotion, injury prevention, child and adolescent health and healthy aging. Expanded coverage of history, values and functions of global health plus new content about COVID-19 prevention and implementation, science, culture and health ecosystem and planetary health, interprofessionalism and other trending themes have been added. Chapters and sections are organized to ease navigation for eBook readers. More than 350 tables, figures and photographs enliven the content. The glossary provides definitions for more than 900 key terms. A robust set of instructor's materials provide discussion prompts for each section of the text, active learning exercises for each chapter, author-created PowerPoint slides, quiz and test banks and sample syllabi. Learn more about CUGH's recommended Student Learning Objectives (SLOs) and how the Fourth Edition aligns with them in Kathryn Jacobsen's recent webinar with co-presenter Caryl Waggett, *Teaching Global Health to Undergraduates: Global Health courses in public health, nursing, allied health and liberal arts schools and programs* 2024, 640 pages. *Introduction to Global Health Promotion* Rick S.
