Sharma, Shashank Shekhar, 2022-09-13 *Biodegradability of Conventional Plastics Opportunities Challenges and Misconceptions* brings together innovative research on the biodegradability of conventional plastics providing an extensive overview of approaches and strategies that may be implemented while also highlighting other methods for alleviating the eventual environmental impact of plastics. The book begins by providing a lifecycle assessment of plastics, the environmental impact of plastic waste and the factors that affect the biodegradability of plastics. The different categories and terminologies surrounding bio based plastics and biodegradable plastics are then defined and explained in detail as are the issues surrounding bioplastics. Other sections discuss biodegradability approaches for enhanced biodegradability of various major types of plastics including polyolefins, polyethylene terephthalate (PET), polystyrene, poly vinyl chloride, automotive plastics and composites and agricultural plastic waste. The final part of the book focuses on further techniques and emerging areas including the utilization of chemical additives, nanomaterials, the role of microbes in terms of microbial degradation and microbial attaching, revalorization of plastic waste through industrial biotechnology and future opportunities and challenges. Explains the fundamentals of plastic waste lifecycle assessment and factors that influence the biodegradability of plastics. Provides novel techniques for improved biodegradability exploring areas such as pre treatment, chemical additives, nanomaterials and microbial degradation. Addresses current challenges and limitations in relation to bio based and biodegradable plastics, microplastics and nanoplastics from bioplastics and plastic waste. *Science Digest* [84], 1984

Antidiabetic Medicinal Plants M. Naeem, Tariq Aftab, 2023-09-29 *Medicinal Plants with Antidiabetic Properties Applications and Opportunities* is the first comprehensive reference to present the state of current research as well as those developments that are impacting developments in the use of plants to address diabetic conditions. Presenting multiple perspectives on the plants, their identification, cultivation and application, this book presents the state of the art with an eye toward the future. Herbal drugs and their components with insignificant toxicity and limited or no side effects are valuable therapeutic alternatives in the treatment of diabetes around the world and have been considered a fundamental source of potent antidiabetic drugs. Exploration of plants containing numerous bio active compounds such as flavonoids, terpenoids, saponins, carotenoids, alkaloids and glycosides for their potential antidiabetic properties is increasing as alternative treatments for this globally devastating disease are sought. Presented in 5 parts, the book first provides an overview of those plants with antidiabetic properties, then moves to the agricultural practices for the cultivation and production of those plants. Part Three focuses on the chemical composition and phytochemicals of the plants, before then moving into a study of the physiological, biotechnological and molecular approaches to optimizing these plants. The book concludes with insights into current and potential future medical and clinical applications. The book is ideal for those seeking to understand the biology

and chemistry of plants with anti diabetic properties and their effective development and application Includes insights from laboratory research to field application Presents perspectives from agriculture biotechnology molecular biology pharmaceutical pharmacological and clinical trials Highlights the cost effective and eco friendly technologies for sustainable agricultural developments in antidiabetic plants **AKASHVANI** Publications Division (India), New Delhi, 1962-01-28
