Research in Applied Economics Mahmoud Abul Eyoun,2026-02-04 Research in applied economics is not only important to students and researchers to the contrary it is also important for managers business leaders decision makers and even politicians Every research effort is a useful tool for those who are seeking answers A researcher in economics needs to understand both macroeconomics and microeconomics as they represent the core of economics before doing research It is also important for the researcher to build his her methodological and critical thinking and communication skills to be able to

conduct research However it is essential that a researcher separate his or her own beliefs and values from the results proved by evidence from research as this will add integrity to the research The researcher should not prejudge the causes before ending the research process and testing its results That is why we always advise students and researchers to be neutral not biased and to be patient not hasty Most students and researchers fail to understand what is written in books on research methodology because those books are generally written in technical language using theoretical approaches To avoid that I tried to draft this book using nontechnical language as much as possible using a direct approach to explain what is needed to be a good researcher Hoping that my approach will guide the readers to understand the basics of research in applied economics Having said all that this book is not about the philosophy of research or the statistical or mathematical research methods to be used it is simply about how to do empirical research in applied economics Therefore the objectives of this book are to introduce the reader to applied economics give him her an overview of how to do research and guide them to know how to plan design implement and draft good research
