Roger Penrose: Collected Works Roger Penrose, 2010-10-14 The first volume of six bringing together 50 years of the work of Professor Sir Roger Penrose

The Impossible Man Patchen Barss, 2024-11-12 The first biography a stunning achievement Kai Bird American Prometheus of the dazzling and painful life of Nobel Prize winning physicist Roger Penrose When he was six years old Roger Penrose discovered a sundial in a clearing near his house Through that machine made of light shadow and time Roger glimpsed a world behind the world of transcendently beautiful geometry It spurred him on a journey to become one of the world's most influential mathematicians philosophers and physicists Penrose would prove the limitations of general relativity set a new agenda for theoretical physics and astound colleagues and admirers with the elegance and beauty of his discoveries However as Patchen Barss documents in *The Impossible Man* success came at a price He was attuned to the secrets of the universe but struggled to connect with loved ones especially the women who care for or worked with him Both erudite and poetic *The Impossible Man* draws on years of research and interviews as well as previously unopened archives to present a moving portrait of Penrose the Nobel Prize winning scientist and Roger the human being It reveals not just the extraordinary life of Roger Penrose but asks who gets to be a genius and who makes the sacrifices that allow one man to be one

Foundations of General Relativity Klaas Landsman, 2021-10-08 This book dedicated to Roger Penrose is a second mathematically oriented course in general relativity It contains extensive references and occasional excursions in the history and philosophy of gravity including a relatively lengthy historical introduction The book is intended for all students of general relativity of any age and orientation who have a background including at least first courses in special and general relativity differential geometry and topology The material is developed in such a way that through the last two chapters the reader may acquire a taste of the modern mathematical study of black holes initiated by Penrose Hawking and others as further influenced by the initial value or PDE approach to general relativity Successful readers might be able to begin reading research papers on black holes especially in mathematical physics and in the philosophy of physics The chapters are Historical introduction General differential geometry Metric differential geometry Curvature Geodesics and causal structure The singularity theorems of Hawking and Penrose The Einstein equations The 3+1 split of space time Black holes I Exact solutions and Black holes II General theory These are followed by two appendices containing background on Lie groups Lie algebras constant curvature and on Formal PDE theory

Learned Lives in England, 1900-1950 William C. Lubenow, 2020 If objectivity was the great discovery of the nineteenth century uncertainty was the great discovery of the twentieth century

Shadows of the Mind Roger Penrose, 1994 Presents the author's thesis that consciousness in its manifestation in the human quality of understanding is doing something that mere computation cannot and attempts to understand how such non computational action might arise within scientifically comprehensive physical laws
