*Field Methods for Geologists and Hydrogeologists* Fakhry A. Assaad, James W. LaMoreaux, Travis Hughes, 2013-03-09 This book is designed for scientists and engineers who want practical information to plan, manage, write and review geologic and hydrologic projects and reports. It provides step by step methods to prepare more timely, readable and technically accurate reports. Detailed guidelines are provided to prepare the different subjects included in this book. Source references, project proposals and checklists are included to assist authors. The use of the techniques described in this book will result in less time spent in report writing, editing, rewriting and review which will save time and money. This book is the result of nearly 50 years of experience in program and project development in the field of hydrogeology. The two main authors, P. E. LaMoreaux and Fakhry Assaad, who submitted both the idea and the major subjects of the book, have been closely associated during this period with the Geological Survey of Egypt, the General Desert Development Organization in Egypt, the U.S. Geological Survey, USGS, the Geological Survey of Alabama, the University of Alabama, and in a great variety of consulting projects in different States of America and over the world. It is based on experience from the assignment and supervision of many professionals with a great variety of academic training and experience. **Quaternary Deserts and Climatic Change** A.S.

Alsharhan, K.W., Glennie, G.L., Whittle, 2020-08-27 These proceedings record the results of climate change in many areas which are hyper arid deserts today but which almost cyclically at intervals of thousands or even hundreds of thousands of years have had a much more humid climate. *Water Resources and Integrated Management of the United Arab Emirates*

Ahlbrandt, 2000-04-01 Papers cover the entire spectrum of eolian investigations ranging from the microscopic level to regional synthesis as well as ancient eolian deposits and their interpretation. *Killarney Bay*

David S. Brose, Patrick Julig, John M. O'Shea, 2021-11-16 The archaeological site at Killarney Bay on the northeast side of Georgian Bay in Ontario, Canada, has attracted and mystified archaeologists for decades. The quantities of copper artifacts, exotic cherts and long distance trade goods all highlight the importance of the site during its time of occupation. Yet researchers have struggled to date the site or assign it to a particular cultural tradition since the artifacts and mortuary

components do not precisely match those of other sites and assemblages in the Upper Great Lakes The history of archaeological investigation at Killarney Bay stretches across parts of three centuries and involves field schools from universities in two countries Laurentian University in Canada and the University of Michigan in the United States This volume pulls together the results from all prior research at the site and represents the first comprehensive report ever published on the excavations and finds at Killarney Bay Heavily illustrated
