The Astrological World of Jung's 'Liber Novus' Liz Greene, 2018-02-21 C G Jung's *The Red Book Liber Novus* published posthumously in 2009 explores Jung's own journey from an inner state of alienation and depression to the restoration of his soul as well as offering a prophetic narrative of the collective human psyche as it journeys from unconsciousness to a greater awareness of its own inner dichotomy of good and evil Jung utilised astrological symbols throughout to help him comprehend the personal as well as universal meanings of his visions In *The Astrological World of Jung's Liber Novus* Liz Greene explores the planetary journey Jung portrayed in this remarkable work and investigates the ways in which he used astrological images and themes as an interpretive lens to help him understand the nature of his visions and the deeper psychological meaning behind them Greene's analysis includes a number of mythic and archetypal elements including the stories of Salome Siegfried and Elijah and demonstrates that astrology as Jung understood and worked with it is unquestionably one of the most important foundation stones of analytical psychology and an essential part of understanding his legacy This unique study will appeal to analytical psychologists and Jungian psychotherapists students and academics of Jungian and post Jungian theory the history of psychology archetypal thought mythology and folklore the history of New Age movements esotericism and psychological astrology

What is Science? Donald J. DeGracia, 2014-05-23 In spite of the amazing technological marvels of the modern world that have stemmed from science there is no agreed upon definition of what science is In this lively colorful and engaging work Don DeGracia contends that science is a very weak form of what has been described for thousands of years in Hindu India as samadhi Samadhi is an advanced technique of Raja Yoga in which the meditating subject fuses with the object of meditation in a process that has been called knowing by being By understanding science as a weak form of samadhi and comparing it to the knowledge acquired from yogic practices many of the limitations of science are brought to the fore These include the link between mind and body the role of the senses as middle men between the mind and the objects of perception why mathematics is unreasonably effective for describing the
