Risk Management in Crisis Piotr Jedynek, Sylwia Bąk, 2021-08-19 Risk management is a domain of management which comes to the fore in crisis This book looks at risk management under crisis conditions in the COVID 19 pandemic context The book synthesizes existing concepts strategies approaches and methods of risk management and provides the results of empirical research on risk and risk management during the COVID 19 pandemic The research outcome was based on the authors study on 42 enterprises of different sizes in various sectors and these firms have either been negatively affected by COVID 19 or have thrived successfully under the new conditions of conducting business activities The analysis looks at both the impact of the COVID 19 pandemic on the selected enterprises and the risk management measures these enterprises had taken in response to the emerging global trends The book puts together key factors which could have determined the enterprises failures and successes The final part of the book reflects on how firms can build resilience in challenging times and suggests a model for business resilience The comparative analysis will provide useful insights into key strategic approaches of risk management The Open Access version of this book available at <http://www.taylorfrancis.com/books/oa/mono/10.4324/9781003131366> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Play Among Books Miro Roman, Alice_ch3n81, 2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science

Mediterranean Architecture and the Green-Digital Transition Ali Sayigh, 2023-10-09 This book contains selected papers presented during the World Renewable Energy Network's biannual World Med Green Forum MGF The 2022 MGF highlights the role of renewable energy applications in the sustainable building sector with a focus on the Mediterranean region as a foundation for a truly positive energy future MGF is an open roundtable for an international community of researchers practitioners and experts to discuss the most innovative and promising sustainable building technologies The papers presented explore the intersection between twin transitions in policies programs projects and experimentation with the digital domain innovating the green building sector towards more reliable and inclusive planning and design practices in order to collectively envision future buildings and cities

Revolutionizing Digital Healthcare Through Blockchain Technology Applications Tang, Yuk Ming, Chau, Ka Yin, Ho, G.T.S., Wan, Yan, 2023-03-27 Despite blockchain being an

emerging technology that is mainly applied in the financial and logistics domain areas it has great potential to be applied in other industries to generate a wider impact Due to the need for social distancing globally blockchain has great opportunities to be adopted in digital health including health insurance pharmaceutical supply chain remote diagnosis and more

Revolutionizing Digital Healthcare Through Blockchain Technology Applications explores the current applications and future opportunities of blockchain technology in digital health and provides a reference for the development of blockchain in digital health for the future Covering key topics such as privacy blockchain economy and cryptocurrency this reference work is ideal for computer scientists healthcare professionals policymakers researchers scholars academicians practitioners instructors and students

Data Science with Semantic Technologies Archana Patel,Narayan C. Debnath,2023-06-20 Gone are the days when data was interlinked with related data by humans and human interpretation was required Data is no longer just data It is now considered a Thing or Entity or Concept with meaning so that a machine not only understands the concept but also extrapolates the way humans do Data Science with Semantic Technologies Deployment and Exploration the second volume of a two volume handbook set provides a roadmap for the deployment of semantic technologies in the field of data science and enables the user to create intelligence through these technologies by exploring the opportunities and eradicating the challenges in the current and future time frame In addition this book offers the answer to various questions like What makes a technology semantic as opposed to other approaches to data science What is knowledge data science How does knowledge data science relate to other fields This book explores the optimal use of these technologies to provide the highest benefit to the user under one comprehensive source and title As there is no dedicated book available in the market on this topic at this time this book becomes a unique resource for scholars researchers data scientists professionals and practitioners This volume can serve as an important guide toward applications of data science with semantic technologies for the upcoming generation
