Monitoring, Evaluation, Accountability, & Learning (Meal) - A Complete Guide 'Yemi Adeyemi-Enilari,2025-08-28

In a world of finite resources and infinite need the pressure to demonstrate results has never been greater It is no longer enough to do good work we must be able to prove that our work is good understand why it is effective and show how we are committed to doing it even better This is the challenge that MEAL is designed to meet For too long these components have been treated as separate or secondary functions Monitoring was about counting things Evaluation was a dreaded post mortem Accountability was a vague promise Learning was something that happened by accident if at all This guide is built on a more integrated and powerful premise that M E A and L are four deeply interconnected pillars that together create a virtuous cycle of performance and improvement Monitoring M is the systematic collection of data that tells you if you are on track It is your project s navigation system Evaluation E is the periodic objective assessment that tells you if you are on the right track altogether and what results you have achieved It is your project s strategic review Accountability A is the process of taking responsibility for your actions and being answerable to stakeholders especially the communities you work with It is your project s moral compass Learning L is the intentional process of using all the information from M E and A to ask critical questions generate insights and adapt your strategy It is your project s engine for growth When these four pillars work in harmony they transform a project from a rigid set of planned activities into a dynamic intelligent and responsive organism
