A New History of Management Stephen Cummings, Todd Bridgman, John

Hassard, Michael Rowlinson, 2017-09-19 Existing narratives about how we should organize are built upon and reinforce a concept of good management derived from what is assumed to be a fundamental need to increase efficiency. But this assumption is based on a presentist monocultural and generally limited view of management's past. A New History of Management disputes these foundations. By reassessing conventional perspectives on past management theories and providing a new critical outline of present day management it highlights alternative conceptions of good management focused on ethical aims sustainability and alternative views of good practice. From this new historical perspective existing assumptions can be countered and simplistic views disputed offering a platform from which graduate students researchers and reflective practitioners can develop alternative approaches for managing and organizing in the twenty first century.
