Folwell,2015-07-02 Excerpt from Water Supply Engineering The Designing Construction and Maintenance of Water Supply  
Systems Both City and Irrigation During the eighteen years since the first edition of this book was written there have been  
great advancements in water works theory and practice especially in those branches having to do with the quality of water  
Consequently not merely a revising but an entire rewriting of the book seemed to be necessary if it was to continue to be of  
any service to water works students and practitioners In the present edition the matter treating of water purification and the  
quality of water has been entirely rewritten at much greater length that describing pumping machinery also is practically  
new throughout and hardly a paragraph of the original text has been used without some change calculated to bring the  
subject up to date This resulted in considerably increasing the length of a work that was already too long from some points of  
view and Part II of the first two editions dealing with Construction has been condensed to a single chapter and Part III  
dealing with Maintenance has been omitted altogether Also the chapter on Hydraulics has been omitted since those using the  
book are assumed to be familiar with and to possess a text book discussing the principles of this subject Several of the  
chapters have been rearranged so as to present the subject matter in a somewhat more logical order About the Publisher  
Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book  
is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the  
work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in  
the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of  
imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
