Improving Forecasts with Integrated Business Planning Ganesh Sankaran,Federico Sasso,Robert Kepczynski,Alessandro Chiaraviglio,2019-03-05 This book provides both a broad overview of the forecasting process covering technological and human aspects alike and deep insights into algorithms and platform functionalities in the IBP toolbox required to maximize forecast accuracy Rich in technical and business explanations it addresses short medium and long term forecasting processes using functionalities available in demand planning and demand sensing There are also several theoretical concepts underpinning the algorithms discussed these are explained with numerical examples to help demystify the IBP forecasting toolbox Beyond standard procedures the book also discusses custom approaches e g new segmentation criteria new outlier detection and correction methods and new methods e g the use of Markov chains for forecasting sporadic demands etc It subsequently benchmarks common practices using these innovative approaches and discusses the results As measurement is an important precondition for improvement an entire chapter is devoted to discussing process improvement and value using the Six Sigma methodology In closing the book provides several useful tips and tricks that should come in handy during project implementation **Steel 4.0** Yilmaz Uygun,Atilla Özgür,Marc-Thorsten Hütt,2024-07-03 This book addresses digitalization and the steel industry It is written from the perspective of both industrial engineering and data science and discusses digitalization problems novel production planning and scheduling algorithms in ironmaking and steelmaking machine learning applications and opportunities in steel plants and quality related algorithms in steel plants Even though digitalization is an important trend in steel industry current contributions mainly focus on lower automation levels i e field and control levels that are mainly covered in mechanical electrical and material engineering domains On higher planning levels there are hardly comprehensive scientific contributions on intelligent digitalization issues available This book fills this gap **Supply Chain Management in Manufacturing and Service Systems** Sharan Srinivas,Suchithra Rajendran,Hans

Ziegler,2021-06-25 Management of supply chains has been evolving rapidly over the last few years due to the inception of Industry 4.0 where businesses adopt automation technologies and data exchanges leading to dynamic and interconnected supply chain systems. Emphasizing on analytical approaches such as predictive and prescriptive modeling, this book presents state-of-the-art original research work dealing with advanced analytical models for the design, planning, and operation of the supply chain to provide faster and smarter decisions in the era of digitization. In particular, the book integrates machine learning and operations research models for faster and smarter decisions, presents prescriptive analytics models for strategic, tactical, and operational decision making in the supply chain, and addresses recent challenges such as sustainability in the supply chain, supply chain visibility, and supply chain digitalization. Key concepts are illustrated using real-life case studies, making the book a valuable reference for researchers, technical professionals, and students. *Managing Inherent Technical*

*Isolation* Daniel Charles,2022-08-01 In the current business environment, many companies consciously or subconsciously practice a culture of inherent technical isolation (ITI). ITI exists when businesses and IT leaders, in particular, consistently provide preferential treatment to team members in their organizations on the basis of technical versus nontechnical competency. This book is written to not only draw attention to the ITI culture but to also promote an inclusive management practice that would eventually make the culture extinct. Essentially, the book seeks to promote a new business and technology management culture void of inherent technical isolation practices. **Next-Gen Supply Chains** C Kishor Kumar Reddy, Vijay Kumar Sadanand, Anindya Nag, Haifa Nakouri,2026-02-18

This book is a forward-looking anthology that redefines the landscape of supply chain management in the era of rapid technological advancement and global disruption. Spanning continents and industries, this book brings together innovative research, practical insights, and visionary frameworks from leading academics, professionals, and technologists. Covering a spectrum of emerging topics from Artificial Intelligence, Machine Learning, Blockchain, and IoT to Quantum Computing, Hyper Automation, and Green Supply Chains, this volume provides a comprehensive roadmap to the future of supply chain systems. It delves into the evolution from linear to circular models, explores the convergence of human intelligence and digital transformation in Supply Chain 5.0, and addresses sector-specific applications, regional shifts, and ethical imperatives. Structured into thematic sections, the book equips academics, students, industry practitioners, and policymakers with tools to understand and shape the next generation of resilient, transparent, and sustainable supply chains. Whether you're navigating challenges in real-time logistics, building inclusive frameworks for underserved markets, or exploring the ethical dimensions of autonomous decision making, this book offers critical knowledge to lead and innovate in a complex global environment. Prepare to engage with the future of global operations where technology, sustainability, and human ingenuity converge to create intelligent supply chains for tomorrow.

**Business Events** Susheel Dutta,2025-02-20 *Business Events: A Comprehensive Guide* is a detailed handbook designed to offer invaluable insights, strategies, and best practices for successfully organizing and managing business events. Tailored for
