apply machine learning causal analysis and Bayesian network learning methods for more accurate quantitative risk assessment with applications to occupational risks from inhalation exposures Finally Part III examines applications to public health risks from air pollution especially fine particulate matter PM2.5 air pollution The book applies freely available browser analytics software and data sets that allow readers to download data and carry out many of the analyses described in addition to applying the techniques discussed to their own data <http://cox.associates.com/8899> Data Analytics and AI for Quantitative Risk Assessment and Financial Computation Galety, Mohammad Gouse, Claver, Jimbo Henri, Sriharsha, A.
