Abstract— Surveillance is an important component of secure infrastructure. People need to ensure that their properties, homes, friends, families, and valuables are protected from intruders. In this article, we developed an enhanced background subtraction algorithm for smart surveillance of homes under changes in illumination. An adaptive Gaussian Mixture technique was applied to improve the conventional background subtraction technique for smart surveillance system by reducing false positives and improving the system performance in motion detection. The developed smart surveillance system has the ability to send notifications containing intruder's image to registered email account and short message system to registered phone number whenever motion is detected. The performance evaluation of developed algorithm showed a sensitivity of 89%, specificity of 92% and an accuracy of 93.56%. This system works in conditions of illumination changes and can be adopted in motion detection for home surveillance.

Keywords— Background Subtraction, Motion detection, Receiver Operating Characteristics, Short Message Service, Specificity, Sensitivity, Surveillance, Smart

1. INTRODUCTION

As an essential component of many security associations' priorities, video surveillance has demonstrated its importance and benefits many times by providing immediate supervision of possessions, people, the environment and property [1]. The demand for video surveillance systems is increasing rapidly nowadays. One of the first things important to people is about their monitoring system, whether or not they have the ability to connect to it via the Internet for remote viewing. In the past, security systems had to be monitored by a guard who was locked in a room all day to monitor the video feeds to make sure nothing happened [2]. The other option was to come back and view the video footages, but at that instance, damage might be caused to the stored images under monitoring. Therefore, researchers and scientists have had to find ways to overcome this problem and thereby improve overall safety.

Simply, Surveillance can be defined as the process of closely monitoring changing information like activities, conducts, behaviors for the purpose of protecting, managing, influencing and directing people [3]. The word surveillance is derived from two French words: "sur" which means "over" and "veiller" meaning "watch" which is in turn derived from the Latin word "vigilare" and is in contrast

to more recent developments such as sousveillance [4]. Surveillance could also mean watching over from a distance by means of electronic equipment such as Close Circuit Television (CCTV) cameras [5]. Surveillance is very helpful to law enforcement agents to investigate and prevent criminal activities, for recognizing and monitoring possible threats to an infrastructure. Basically, the design of a surveillance system consists of analyzing the needs of the people, reviewing the system costs based on existing hardware and software technologies, monitoring choices and then planning for the installation [6]. The design choices may vary from time to time due to advancement in technology. Surveillance system has always been playing a vital role in dealing with the burglary cases and protection of entire perimeter of an infrastructure [7].

Moving object detection is a critical task for many computer vision applications; the objective is the classification of the pixels in the video sequence into either foreground or background [10]. A commonly used technique to achieve this in scenes captured by a static camera is Background Subtraction (BGS) [11]. Background subtraction is the process of identifying moving objects from the portion of a video frame that differs significantly from a background scene [12]. An Adaptive Gaussian Mixture Technique (AGMT) can be used to detect motion or intruders by alerting the user of possible intrusion of infrastructure under surveillance.

In this contribution, we develop a smart surveillance system using AGMT to improve the basic BGS technique in motion detection. The problem of the BGS techniques are: inability to adapt to illumination changes, inability to mask areas where motion detection is not needed like rotation of fans in homes, surveillance being placed outdoors and the existence of trees moving under the wind which affect surveillance focus [8].

Also, this technique was implemented to avoid the use of motion detection sensors like the passive infrared sensors due to the following drawbacks: high sensitivity which leads to the detection of objects such as rats, improper function in hot areas due to faulty readings caused by an increase in temperature, high rate of maintenance in which a lack of could lead to sensor failure, and high cost of implementation [9]. This work makes use of camera for both video surveillance and motion detection simultaneously. In essence, this system improves on the basic background

Embedded Surveillance System Using Background Subtraction

Embedded Surveillance System Using Background Subtraction:

Proceedings of the 6th International Conference on Electrical, Control and Computer Engineering Zainah Md. Zain, Mohd. Herwan Sulaiman, Amir Izzani Mohamed, Mohd. Shafie Bakar, Mohd. Syakirin Ramli, 2022-03-08 This book presents the proceedings of the 6th International Conference on Electrical Control and Computer Engineering InECCE 2021 held in Kuantan Pahang Malaysia on 23 August 2021 The topics covered are sustainable energy power electronics and drives and power engineering including distributed renewable generation power system optimization artificial computational intelligence smart grid power system protection and machine learning energy management and conservation The book showcases some of the latest technologies and applications developed to solve local energy and power problems in order to ensure continuity reliability and security of electricity for future generations It also links topics covered the sustainable developed goals SDGs areas outlined by the United Nation for global sustainability The book will appeal to professionals scientists and researchers with experience in industry

Computational Intelligence in Surveillance Systems Using Image Processing Jay Kumar Pandey, Mritunjay Rai, Momina Shaheen, Faizan Ahmad, 2026-03-07 Traditional surveillance systems struggle to process large volumes of visual data identify specific objects or behaviors and adapt to dynamic environments Computational intelligence which encompasses techniques like artificial intelligence AI machine learning ML and computer vision offers powerful tools to address these challenges by enabling automated analysis pattern recognition and decision making based on visual data Computational Intelligence in Surveillance Systems Using Image Processing addresses the unique challenges and ethical considerations of applying AI and ML offering a nuanced understanding of the regulatory landscape It provides insights into the responsible development and deployment of technologies to unlock the transformative potential of computational intelligence to revolutionize surveillance systems and advance the capabilities of security and monitoring across various sectors Discusses emerging trends potential challenges and areas for future research providing a roadmap for scholars looking to contribute to the evolving field of image processing Explains how AI and ML algorithms can be applied to analyze and interpret visual data captured by surveillance cameras Considers the challenges and considerations associated with deploying computational intelligence in surveillance including privacy concerns ethical considerations and technical limitations Explores specific use cases and applications where computational intelligence can enhance surveillance capabilities such as object detection activity recognition anomaly detection and predictive analytics

Computing Technologies for Sustainable Development Prasanna Devi Sivakumar, Raj Ramachandran, Chitra Pasupathi, Prabha Balakrishnan, 2025-02-14 This book constitutes the refereed proceedings of the First International Research Conference on Computing Technologies for Sustainable Development IRCCTSD 2024 held in Chennai India during May 9 10 2024 The 65 full papers and 14 short papers presented here were carefully selected and reviewed from 264 submissions These papers have been organized in the following topical sections Part I innovations in precision agriculture techniques and strategies for

enhancing agriculture production classification and prediction analysis in healthcare animal welfare and innovations in diagnostics Part II video and image processing for security analysis innovations for smart cities sustainable practices in e-commerce challenges and trends Part III environmental analysis and protection inclusive communication techniques AI for text audio image and video processing and application of AI for education

Smart Sensors and Systems Yongpan Liu, Youn-Long Lin, Chong-Min Kyung, Hiroto Yasuura, 2020-06-10 This book describes for readers technology used for effective sensing of our physical world and intelligent processing techniques for sensed information which are essential to the success of Internet of Things IoTs The authors provide a multidisciplinary view of sensor technology from materials process circuits and big data domains and showcase smart sensor systems in real applications including smart home transportation medical environmental agricultural etc Unlike earlier books on sensors this book will provide a global view on smart sensors covering abstraction levels from device circuit systems and algorithms Profiles active research on smart sensors based on CMOS microelectronics Describes applications of sensors and sensor systems in cyber physical systems the social information infrastructure in our modern world Includes coverage of a variety of related information technologies supporting the application of sensors Discusses the integration of computation networking actuation databases and various sensors in order to embed smart sensor systems into actual social systems

Distributed Video Sensor Networks Bir Bhanu, China V. Ravishankar, Amit K. Roy-Chowdhury, Hamid Aghajan, Demetri Terzopoulos, 2011-01-04 Large scale video networks are of increasing importance in a wide range of applications However the development of automated techniques for aggregating and interpreting information from multiple video streams in real life scenarios is a challenging area of research Collecting the work of leading researchers from a broad range of disciplines this timely text reference offers an in depth survey of the state of the art in distributed camera networks The book addresses a broad spectrum of critical issues in this highly interdisciplinary field current challenges and future directions video processing and video understanding simulation graphics cognition and video networks wireless video sensor networks communications and control embedded cameras and real time video analysis applications of distributed video networks and educational opportunities and curriculum development Topics and features presents an overview of research in areas of motion analysis invariants multiple cameras for detection object tracking and recognition and activities in video networks provides real world applications of distributed video networks including force protection wide area activities port security and recognition in night time environments describes the challenges in graphics and simulation covering virtual vision network security human activities cognitive architecture and displays examines issues of multimedia networks registration control of cameras in simulations and real networks localization and bounds on tracking discusses system aspects of video networks with chapters on providing testbed environments data collection on activities new integrated sensors for airborne sensors face recognition and building sentient spaces investigates educational opportunities and curriculum development from the perspective of computer science and

electrical engineering This unique text will be of great interest to researchers and graduate students of computer vision and pattern recognition computer graphics and simulation image processing and embedded systems and communications networks and controls The large number of example applications will also appeal to application engineers

Computer Vision and Internet of Things Lavanya Sharma, Mukesh Carpenter, 2022-05-19 Computer Vision and Internet of Things Technologies and Applications explores the utilization of Internet of Things IoT with computer vision and its underlying technologies in different applications areas Using a series of present and future applications including business insights indoor outdoor securities smart grids human detection and tracking intelligent traffic monitoring e health departments and medical imaging this book focuses on providing a detailed description of the utilization of IoT with computer vision and its underlying technologies in critical application areas such as smart grids emergency departments intelligent traffic cams insurance and the automotive industry Key Features Covers the challenging issues related to sensors detection and tracking of moving objects with solutions to handle relevant challenges Describes the latest technological advances in IoT and computer vision with their implementations Combines image processing and analysis into a unified framework to understand both IOT and computer vision applications Explores mining and tracking of motion based object data such as trajectory prediction and prediction of a particular location of object data and their critical applications Provides novel solutions for medical imaging skin lesion detection cancer detection enhancement techniques for MRI images and automated disease prediction This book is primarily aimed at graduates and researchers working in the areas of IoT computer vision big data cloud computing and remote sensing It is also an ideal resource for IT professionals and technology developers

Background Modeling and Foreground Detection for Video Surveillance Thierry Bouwmans, Fatih Porikli, Benjamin Höferlin, Antoine Vacavant, 2014-07-25 Background modeling and foreground detection are important steps in video processing used to detect robustly moving objects in challenging environments This requires effective methods for dealing with dynamic backgrounds and illumination changes as well as algorithms that must meet real time and low memory requirements Incorporating both established and new ideas Background Modeling and Foreground Detection for Video Surveillance provides a complete overview of the concepts algorithms and applications related to background modeling and foreground detection Leaders in the field address a wide range of challenges including camera jitter and background subtraction The book presents the top methods and algorithms for detecting moving objects in video surveillance It covers statistical models clustering models neural networks and fuzzy models It also addresses sensors hardware and implementation issues and discusses the resources and datasets required for evaluating and comparing background subtraction algorithms The datasets and codes used in the text along with links to software demonstrations are available on the book s website A one stop resource on up to date models algorithms implementations and benchmarking techniques this book helps researchers and industry developers understand how to apply background models and foreground detection

methods to video surveillance and related areas such as optical motion capture multimedia applications teleconferencing video editing and human computer interfaces It can also be used in graduate courses on computer vision image processing real time architecture machine learning or data mining *MEMS, NANO and Smart Systems* Li Yuan,2011-11-29 Selected peer reviewed papers from the 2011 7th International Conference on MEMS NANO and Smart Systems ICMENS 2011 November 4 6 2011 Kuala Lumpur Malaysia Multimedia Content Access A. Hanjalic,Raimondo Schettini,Nicu Sebe,2007 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high quality conferences in the broad ranging fields of optics and photonics These books provide prompt access to the latest innovations in research and technology in their respective fields Proceedings of SPIE are among the most cited references in patent literature

Proceedings ,2003 **Employment of low-cost low-power ARM machines as tracking device for real time vehicle movement** Mark Collins,2014-06-26 Bachelor Thesis from the year 2013 in the subject Computer Science Technical Computer Science grade 69 University of Lincoln School of Computer Science course Computer Science language English abstract This undergraduate Bachelor Thesis examines the use of a raspberry pi towards a real time computer vision system Advances in technology in recent years have steadily increased computational performance ushering in the availability of affordable powerful single board micro systems This project attempts to showcase an application of low cost hardware for performing modern computer vision algorithms paired with imaging sensors to emulate an embedded system In order to achieve this goal the project must demonstrate background learning object detection and establish methods for monitoring the real time movement of pedestrians and vehicles on a road The implementation will make use of a Raspberry Pi type Model B as the main piece of computational hardware to be employed to an IP camera **Journal of VLSI Signal Processing Systems for Signal, Image, and Video Technology** ,2005 **Pattern Recognition and Image Analysis** ,2005 Environmental Monitoring and Remediation Technologies II Tuan Vo-Dinh,Robert L. Embedded Surveillance System Using Background Subtraction Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Embedded Surveillance System Using Background Subtraction free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Embedded Surveillance System Using Background Subtraction free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Embedded Surveillance System Using Background Subtraction free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify

the authenticity of the source before downloading Embedded Surveillance System Using Background Subtraction. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Embedded Surveillance System Using Background Subtraction any PDF files. With these platforms, the world of PDF downloads is just a click away.

FAQs About Embedded Surveillance System Using Background Subtraction Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Embedded Surveillance System Using Background Subtraction is one of the best book in our library for free trial. We provide copy of Embedded Surveillance System Using Background Subtraction in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Embedded Surveillance System Using Background Subtraction. Where to download Embedded Surveillance System Using Background Subtraction online for free? Are you looking for Embedded Surveillance System Using Background Subtraction PDF? This is definitely going to save you time and cash in something you should think about.
