Indigenous Knowledge Research Questionnaire

Leo P. Chall

Indigenous Knowledge Research Questionnaire:

Promoting sustainable local economic development initiatives Marius Venter, 2022 This book endeavours to outline case studies that promote sustainable Local Economic Development LED initiatives It is generally believed that local governments are the foot soldiers of LED However this seems to be a myth as local governments in South Africa and elsewhere have not yet fulfilled this mandate and have been struggling for several years to implement LED initiatives The distinctive merit of this book lies in the way it combines the South African context with the wider international development context in ways that there is a flow of information and ideas both ways The book is an essential part of this sequence of ideas development and action at a critical time for strategic action directed at a sustainable future It showcases case studies and responses to the impacts of globalisation as a bridge between urban rural and institutional action and reveals avenues for local government leadership in communities research student engagement and wider interactions *Inclusive Science Communication in Theory and Practice* Thomas Hayden, Erika Check Hayden, Mónica Ivelisse Feliú-Mójer, Raychelle Burks, 2022-08-02 *SRICOENV 2022* Hermione Froehlicher, Nambooze Joweria, Frederick Adzitey, Siti Hanggita Rachmawati, Nasib Marbun, Robbi Rahim, 2023-04-12 The 3rd Sriwijaya International Conference on Environmental Issues 3rd SRICOENV 2022 was successfully held on OCTOBER 5th 2022 in Palembang South Sumatera Indonesia virtual conference The 3rd SRICOENV 2022 created a forum for exchanging ideas and research results opened new perspectives in related fields and broadened the horizons of all participants The conference was attended by 350 people from all over the world The conference was divided into three parts including keynote lectures oral presentations and online discussions First the keynote speakers had 30 45 minutes to present Then in the oral presentations their authors presented the outstanding papers we selected individually We are pleased to announce that we have selected many high quality papers from the submissions and included them in the conference proceedings after a rigorous review These papers cover all environmental topics to present the state of the art in environmental and climate change issues All papers have undergone rigorous review to meet the requirements for publication We would like to thank everyone who supported the 3rd SRICOENV 2022 and made it a great success In particular we would like to thank the European Alliance for Innovation EAI for the hard work of all their colleagues in publishing this volume We sincerely hope that the 3rd SRICOENV 2022 was a forum for excellent discussions enabling new ideas and promoting collaborative research *Contemporary Issues in African Sciences and Science Education* Akwasi Asabere-Ameyaw, George J. Sefa Dei, Kolawole Raheem, 2012-09-05 In this careful articulation of science the editors provide an intellectual marriage of Indigenous science and science education in the African context as a way of revising schooling and education They define science broadly to include both the science of the natural physical biological and the science of the social It is noted that the current policy direction of African education continues to be a subject of intense intellectual discussion Science education is very much at the heart of much current debates about reforming African

schooling Among the ways to counter vision contemporary African education this book points to how we promote Indigenous science education to improve upon African science and technology development in general The book also notes a long standing push to re examine local cultural resource knowings in order to appreciate and understand the nature content and context of Indigenous knowledge science as a starting foundation for promoting African science and technology studies in general It is argued that these interests and concerns are not mutually exclusive of each other but as a matter of fact interwoven and interdependent The breadth of coverage of the collection reflect papers in science Indigeneity identity and knowledge production and the possibilities of creating a truly African centred education It is argued that such extensive coverage will engage and excite readers on the path of what has been termed African educational recovery While the book is careful in avoiding stale debates about the Eurocentricity of Western scientific knowledge and the positing of Eurocentric science as the only science worthy of engagement it nonetheless caution against constructing a binary between Indigenous local science and knowledges and Western scientific knowledge After all Western scientific knowledge is itself a form of local knowledge born out of a particular social and historical context Engaging science in a more global context will bring to the fore critical questions of how we create spaces for the study of Indigenous science knowledge in our schools How is Indigenous science to be read understood and theorized And how do educators gather collect and interpret Indigenous science knowledges for the purposes of teaching young learners These are critical questions for contemporary African education
