Hanninen,2012 This book introduces a theory of music analysis that one can use to explore aspects of segmentation and associative organization in a wide range of repertoire including Western classical music from the Baroque to the present with potential applications to jazz and popular music and some non Western musics Rather than a methodology the theory provides analysts with precise language and a broad flexible conceptual framework through which they can formulate and investigate questions of interest and develop their own interpretations of individual pieces and passages The theory begins with a basic distinction among three domains of musical experience and discourse about it the sonic psychoacoustic the contextual or associative sparked by varying degrees of repetition and the structural guided by a specific theory of musical structure or syntax invoked by the analyst A comprehensive presentation of the theory with copious musical illustrations is balanced with close analyses of works by Beethoven Debussy Nancarrow Riley Feldman and Morris Dora A Hanninen is professor of music theory at the University of Maryland She received the 2010 Outstanding Publication Award from the Society for Music Theory

Susan Deborah,Sachindev P.S.,2014-06-19 Indian ecocriticism has not yet adequately demonstrated the applicability of ecological deep ecological tinai principles to visual texts Culture and Media Ecocritical Explorations closes this gap at the most opportune moment Though this volume accommodates ecologically oriented interpretations from several cultures across the world it reserves the centre stage for Indian ecocriticism and ecotheory quite appropriately The volume effectively challenges the major documents on ecocriticism and theory published by international presses which have been reluctant to give space to tinai criticism and theory that transcend Dravidian or Tamil boundaries The day is not far when cinema of the world shaped by tinai theory will employ tinai hermeneutics to gain fresh insight which in turn will feed into the processes of creation and production of relevant and great movies
