

Affixal Negation – Direct, Indirect and their Subtypes¹

Abstract: This article studies the phenomenon of affixal negation with focus on its categorization into two major types: direct (e.g. *direct* vs. *indirect* in English) and indirect (e.g. *to understand* vs. *to misunderstand* in English). It is observed that these two categories encompass the Aristotelian types of negation: contrary and contradictory. It is also observed that these two types are not mutually exclusive and their membership cannot be predicted *a priori*, although paraphrasing of the derivative could offer some help at times in this regard.

Résumé : Cet article a pour but d'examiner le phénomène de la négation à l'aide de l'affixation et particulièrement sa catégorisation en deux grandes classes: directe (ex. : *direct* vs *indirect* en anglais) et indirecte (ex. : *to understand* vs *to misunderstand* en anglais). Ces deux catégories englobent les deux types aristotéliens de négation : « négation contraire » et « négation contradictoire ». Il est à noter que ces deux catégories (*directe* et *indirecte*) ne sont pas mutuellement exclusives. Il est difficile de dire *a priori* si un dérivé appartient à l'une ou l'autre des catégories, mais sa paraphrase pourrait y aider.

1. Introduction

Much literature on negation (Jespersen 1917, Horn 2001, Zeijlstra 2007, Hintikka 2002, Geurts 1998) primarily deals with sentential negation and pays comparatively lesser attention to lexical negation in general, and to affixal negation in particular. Antonymy, which is a part of lexical negation², is treated in the domain of lexicology and to some extent in

1. I would like to express my sincere gratitude towards Remi Jolivet, Pierre Larrivée and Jayant Gadgil for discussions, reviews and insightful suggestions on draft versions of this article, which also benefited from the observations of the participants at the conference *A Contrario* (March 25, 2010), organized by Université de Caen Basse-Normandie.
2. The term "lexical negation" is used to indicate the negation of or at the level of a word. This includes antonymy as well as affixal negation. This does not include the negation of a verb with the help of *not* in English, *ne ... pas* in French, *nicht*

Advances in Corpus-Based Contrastive Linguistics Karin Aijmer, Bengt Altenberg, 2013. Contrastive studies have experienced a dramatic revival in the last decades. By combining the methodological advantages of computer corpus linguistics and the possibility of contrasting texts in two or more languages the structure and use of languages can be explored with greater accuracy detail and empirical strength than before. The approach has also proved to have fruitful practical applications in a number of areas such as language teaching lexicography translation studies

and computer aided translation This volume contains twelve studies comparing linguistic phenomena in English and seven other languages The topics range from comparisons of specific lexical categories and word combinations to syntactic constructions and discourse phenomena such as cohesion and thematic structure The studies highlight similarities and differences in the use semantics and functions of the compared items as well as the emergence of new meanings and language change The emphasis varies from purely linguistic studies to those focusing on practical applications

The Affixes of Negation in French, English, and Czech Kristina Dragounova,2013 This work is conceived as a further study of the units affected by the affixal negation in English and Czech which are now to be compared with French The first parts serve as a brief summary of the findings obtained from the previous research and the re introduction of the classification criteria as well as the observed tendencies in the domain which are subsequently applied on the French language to determine a degree of similarity with English and Czech The main part of the study is devoted to the French negation yielding affixes which are examined with respect to the established criteria the frequency of occurrence on the given parts of speech the origin of the affix and its base the semantic properties of the affix and the base and their translation and compared to the other two languages There the mutual translations of the negative units are to be considered It will be noticed that some elements figure in all the studied inventories In such cases the same procedure will be applied as in the previous research and the analysis will be extended by the cross inventory observations
