

MBA PROJECT REPORT ON RATIO ANALYSIS

Meaning of Ratio:- A ratio is simple arithmetical expression of the relationship of one number to another. It may be defined as the indicated quotient of two mathematical expressions.

According to Accountant's Handbook by Wixon, Kell and Bedford, "a ratio is an expression of the quantitative relationship between two numbers".

Ratio Analysis:- Ratio analysis is the process of determining and presenting the relationship of items and group of items in the statements. According to Batty J. Management Accounting "Ratio can assist management in its basic functions of forecasting, planning coordination, control and communication".

It is helpful to know about the liquidity, solvency, capital structure and profitability of an organization. It is helpful tool to aid in applying judgement, otherwise complex situations.

Ratio analysis can represent following three methods.

Ratio may be expressed in the following three ways :

1. ***Pure Ratio or Simple Ratio :-*** It is expressed by the simple division of one number by another. For example , if the current assets of a business are Rs. 200000 and its current liabilities are Rs. 100000, the ratio of 'Current assets to current liabilities' will be 2:1.
2. ***'Rate' or 'So Many Times :-*** In this type , it is calculated how many times a figure is, in comparison to another figure. For example , if a firm's credit sales during the year are Rs. 200000 and its debtors at the end of the year are Rs. 40000 , its Debtors Turnover Ratio is $200000/40000 = 5$ times. It shows that the credit sales are 5 times in comparison to debtors.
3. ***Percentage :-*** In this type, the relation between two figures is expressed in hundredth. For example, if a firm's capital is Rs.1000000 and its profit is Rs.200000 the ratio of profit capital, in term of percentage, is $200000/1000000 * 100 = 20\%$

Mba Project Report Ratio Analysis:

Fundamentals of Entrepreneurship and Project Planning Madhurima Lall, Sultan Ahmad, 2021-06-01 The book has been designed specifically for students of B Com B Com Hons BBA MBA The book is also helpful to persons starting their own business The book explains the concepts of entrepreneurship innovation Business Plan and financing of new ventures in a very simple manner so it provides in depth knowledge of the subject **Intertie Development and Use**, 1988 CIRDAP Annual Report Center on Integrated Rural Development for Asia and the Pacific, 2009 **Human Resource Executive**, 1992 **Agriculture, Finance, and Sustainability: Emerging Challenges and Future Pathways**, 2026-01-14 Farming has continued to be one of the pillars of economic growth food security and livelihood particularly in the emerging and developing economies Nonetheless the industry is experiencing a spell of high stress There is an interaction effect resulting in increased uncertainty to farmers and agribusiness because of the climate variability and extremes natural resource degradation market volatility and changing policy and trade environments Such dislocations no longer remain on the farm gate They have a growing influence on the ability to pay credit the sustainability of insurance and making investment choices and the stability of financial institutions serving the rural economy This fact reveals one of the main shortcomings of most current practices agriculture finance and sustainability are discussed as the areas and not a collective system That gap is bridged by the edited volume with the involvement of multidisciplinary input which studies the changing agriculture finance sustainability nexus The chapters are a synthesis of views of agriculture economics finance development sustainability research digital innovation and governance Together they demonstrate why it is not possible to have sustainable agriculture without a strong financial architecture and why financial stability is becoming more reliant on climate resilient and sustainability consistent agricultural structures One of the leitmotifs of the volume is the transmission of risks climate based shocks and production volatility may turn into credit stress slowdown recovery and systemic weakness Instruments that can minimize exposure and enhance resilience are also paid special attention in the book Another line of chapters examines agricultural insurance and credit risk modelling with particular emphasis on the way climate information and index based mechanisms can enhance the levels of transparency and speed of intervention as well as considering design issues like basis risk are compromising of trust and performance when compensation is not equal to actual field loss The other stream concentrates on the economic rationale of sustainability transitions Many sustainable agribusiness practices lead to necessary investment in the meantime and institutional commitment but it may actually better the variability in the long run and make agribusiness more resilient The volume shows a greater association of sustainability with main financial performance cost base exposure to risks profitability profile and creditworthy than regarding sustainability solely as an ethical or legal issue The book additionally discusses the fact that Agri FinTech and digital ecosystems are surging and transforming rural finance Digital public infrastructure interoperable data systems and platform based models of delivery can

reduce the cost of a transaction increase coverage and enhance targeting of credit and insurance Meanwhile the chapters acknowledge that digitalization is raising new policy issues namely data governance interoperability affordability last mile connectedness and farmer literacy which needs to be considered so that the digital divide does not continue to reproduce the old inequalities in fresh forms Another closely related body of work covers the topic of Agriculture 4.0 and smart farming adoption where it is stated that the results of technological implementation are determined by local conditions Where the developed world tends to utilize economies of scale under capital intensive and precision systems smallholder dominated nations have varied challenges and opportunities which demand low cost inclusive and institutionally sponsored opportunities Through adoption lenses which construct links between technology organizational capacity and the wider environment the book determines what facilitates uptake and what prevents it in practice Besides in farms and financial products the volume broadens the focus to the form of agricultural markets Chapters on value chains and MSMEs indicate that value chain performance is also influenced by the fact that production is not the only factor that affects value chain performance but rather by the aggregate logistics standards processing market access and availability of finance among other factors along the chain Value chain strengthening can increase incomes and decrease losses of farmers however it is necessary to coordinate interventions not single schemes but comprehensive ones including financial institutional and technological Lastly the book acknowledges the fact that sustainable development requires a harmonizing of governance and policy Incentives and outcomes all over the system are determined by ownership structures corporate governance in the agro firms and the point of direction of the public expenditure Only supported by credible institutions effective regulation and investments by governments in a way that puts more emphasis on productivity enhancing public goods and inclusions can financial innovations be expanded so as to strengthen resilience This book targets a wide range of readers researchers and postgraduates who need to find combined principles policymakers that need to create agricultural and financial solutions that can withstand climate change practitioners in the spheres of banking insurance and technological finance and people employed in agribusiness and value chains as well as technology platforms We want to get the gap between conceptualization and practical evidence and policy relevance providing a consistent perspective of how finance technology governance and sustainability can be mutually defining in the creation of resilient agricultural futures We also hope the book leads readers beyond siloed solutions into the realm of system thinking in which climate adaptation financial inclusion productivity growth and environmental stewardship are all addressed in a concerted effort through a coordinated design The rest of the restraints is upon us and we can embrace further academic work and practitioner consultation to make this developing discipline robust
