

## Gradient concept

In addition to color selection, you can also drag across the color bar to apply a gradient to objects.

1 With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Color** to apply a default gradient. Drag across your object to create a custom path for the gradient.

2 Drag across the artwork to change the length and direction of the gradient path, and drag the midpoint marker to change the midpoint of the gradient between the current color.

3 Position the cursor along the path to modify a blue gradient, for example, which can then be moved along the gradient path.

When you create a gradient object with the **Gradient Tool**, you can drag across the color bar to create a custom path for the gradient.

With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Color** to apply a default gradient. Drag across your object to create a custom path for the gradient.

Drag across the artwork to change the length and direction of the gradient path, and drag the midpoint marker to change the midpoint of the gradient between the current color.

An alternative to an address bar is working with gradients directly on the object. There is a **Gradient Editor** available from the color selector on the toolbar. This tool gives you high precision drag positioning as well as a few additional options.

You can work with **Elliptical** and **Radial** gradients in Adobe Photoshop. To create a radial gradient, use the **Type** pop-up menu on the toolbar. Gradients are available on the **Color & Appearance** panel.
