Automating the Design of Data Mining Algorithms Gisele L. Pappa, Alex Freitas,2009-10-27 Data mining is a very active research area with many successful real world applications. It consists of a set of concepts and methods used to extract interesting or useful knowledge or patterns from real world datasets, providing valuable support for decision making in industry, business, government, and science. Although there are already many types of data mining algorithms available in the literature, it is still difficult for users to choose the best possible data mining algorithm for their particular data mining problem. In addition, data mining algorithms have been manually designed, therefore they incorporate human biases and preferences. This book proposes a new approach to the design of data mining algorithms, instead of relying on the slow and ad hoc process of manual algorithm design, this book proposes systematically automating the design of data mining algorithms with an evolutionary computation approach. More precisely, we propose a genetic programming system, a type of evolutionary computation method that evolves computer programs to automate the design of rule induction algorithms, a type of classification method that discovers a set of classification rules from data. We focus on genetic programming in this book because it is the paradigmatic type of machine learning method for automating the generation of programs, and because it has the advantage of performing a global search in the space of candidate solutions, data mining algorithms in our case, but in principle, other types of search methods for this task could be investigated in the future.

Success in Your Project Philip L. Weaver,2004 This text offers detailed guidance and support for students in preparing for conducting and evaluating a system development project. It also covers projects ranging in scope from feasibility studies and software prototype development to projects covering the entire system development life cycle. *Components, Packaging and Manufacturing Technology* Yanwen Wu,2011-01-20 Selected peer reviewed paper from 2010 International Conference on Components Packaging and Manufacturing Technology ICCPMT 2010 Sanya China December 9-10 2010
