**Ford 429/460 Engines** Jim Smart,2021-12-20 Learn to make incredible horsepower from Ford s most powerful big block engine design For years Ford relied on the venerable FE big block engine design to power its passenger cars trucks and even muscle cars and why not The design was rugged reliable amortized and a proven race winner at Le Mans and drag strips across the country However as is always the case with technology time marches on and Ford had a new design with many improvements in mind Enter the 385 family of engines also known as the Lima big block Produced from 1968 1998 the 385 series engines were used in multiple applications from industrial trucks to muscle cars and luxury cruisers In Ford 429 460 Engines How to Build Max Performance which was written by Ford expert Jim Smart all aspects of performance building are covered including engine history and design induction systems cylinder heads the valvetrain camshaft selection the engine block and rotating assemblies The best options optimal parts matching aftermarket versus factory parts budget levels and build levels are also examined The 429 460 engines are a good platform for stroking so that is covered here as well Whether you want to build a torque monster engine for your off road F 150 a better performing version of a 1970s era smog motor for your luxury Lincoln or an all out high horsepower mill for your muscle car this book is a welcome addition to your performance library

**Ford Big-Block Parts Interchange** George Reid,2017-12-15 Over the course of performance car history and specifically muscle car history big block engines are particularly beloved and for good reason Not only are they the essence of what a muscle car is but before modern technology and stroker engines they were also the best way to make a lot of horsepower All of the Detroit manufacturers had their versions of big block engines and Ford was no exception Actually Ford was somewhat unique

in that it had two very different big block engine designs during the muscle car era The FE engine was a design pioneered in the late 1950s primarily as a more powerful replacement for the dated Y block design because cars were becoming bigger and heavier and therefore necessitated more power to move What started as torque engines meant to move heavyweight sedans morphed into screaming high performance mills that won Le Mans and drag racing championships through the 1960s By the late 1960s the design was dated so Ford replaced the FE design with the 385 series also known as the Lima design which was more similar to the canted valve Cleveland design being pioneered at the same time It didn't share the 1960s pedigree of racing success but the new design was better in almost every way it exists via Ford motorsports offerings to this day In Ford Big Block Parts Interchange Ford expert and historian George Reid covers both engines completely Interchange and availability for all engine components are covered including cranks rods pistons camshafts engine blocks intake and exhaust manifolds carburetors distributors and more Expanding from the previous edition of High Performance Ford Parts Interchange that covered both small and big block engines in one volume this book cuts out the small block information and devotes every page to the FE Series and 385 big blocks from Ford which allows for more complete and extensive coverage
