Algorithms and Complexity in Mathematics, Epistemology, and Science Nicolas

Fillion, Robert M. Corless, Ilias S. Kotsireas, 2019-02-07 *ACMES Algorithms and Complexity in Mathematics Epistemology and Science* is a multidisciplinary conference series that focuses on epistemological and mathematical issues relating to computation in modern science. This volume includes a selection of papers presented at the 2015 and 2016 conferences held at Western University that provide an interdisciplinary outlook on modern applied mathematics that draws from theory and practice and situates it in proper context. These papers come from leading mathematicians, computational scientists, and philosophers of science and cover a broad collection of mathematical and philosophical topics including numerical analysis and its underlying philosophy, computer algebra, reliability and uncertainty, quantification, computation and complexity theory, combinatorics, error analysis, perturbation theory, experimental mathematics, scientific epistemology, and foundations of mathematics. By bringing together contributions from researchers who approach the mathematical sciences from different perspectives, the volume will further readers' understanding of the multifaceted role of mathematics in modern science, informed by the state of the art in mathematics, scientific computing, and current modeling techniques. Quantitative Physiology Shangbin Chen, Alexey Zaikin, 2021-02-09 Stephen Hawking says that the 21st century will be the century of complexity and indeed now systems biology or medicine means dealing with complexity. Both the genome and proteome have emerged in studying complex physiological systems. Computational and mathematical modeling has been regarded as an efficient tool to boost the understanding about living systems in normal or pathophysiological states. Covering applied methodology, basic case studies, and complex applications, this volume provides researchers with an overview of modeling and computational studies of physiology, i.e., quantitative physiology, which is becoming an increasingly important branch of systems biology. This book aims to build multi-scale models to investigate functions in living systems and explain how biomolecules, cells, organs, organ systems, and organisms carry out the chemical or physical functions. Some of the models addressed are related to gene expression, calcium signalling, neural activity, blood dynamics, and bone mechanics. Combining theory and practice with extensive use of MATLAB, this book is designed to establish a paradigm for quantitative physiology by integrating biology, mathematics, physics, and informatics, etc. To benefit from this book, the readers are expected to have a background in general physiology and mathematics. Celebrating Research Philip N. Cronenwett, Kevin Osborn, Samuel Allen Streit, 2007 ARL has published a book and Web site profiling selected rare and special collections in major research libraries of North America. Celebrating Research: Rare and Special Collections from the Membership of the Association of Research Libraries. The compendium is a sampling of the abundance and variety of collections available for use. Special collections have been broadly construed to encompass distinctive rare and unique, emerging media, born digital, digitized, uncommon, non-standard, primary, and heritage materials. Celebrating Research includes 118 collection profiles, each from a different ARL.

member library Each profile is illustrated with color photographs and tells a story of a single collection recounting how the resources were acquired and developed The compilation is rich with examples of how research libraries are engaging different communities to deliver library services and encourage the use of such distinctive collections Also included is an introductory essay by British rare book expert Nicolas Barker and an appendix that provides a broad description of each library s special collection holdings and pertinent contact information The book contains a detailed index the Web site provides a search engine The volume is the result of a collaborative effort among ARL member libraries on the occasion of the Association s 75th anniversary It was edited by Philip N Cronenwett Special Collections Librarian Emeritus Dartmouth College Library Kevin Osborn Research and Samuel A Streit Director for Special Collections Brown University Library
