The Little Book of Service Management Harry Katzan Jr., 2022-03-09 Service is the up and coming discipline for the 22nd century But exactly what is service Many people think that service is what people do no more no less Nothing can be farther from the truth Then if so why is the service community in constant disarray Startup businesses fail on a regular basis Why They simply do not provide good service Many persons in responsible positions rarely give service even a brief notice What they subconsciously think about service has to be the truth How often do you hear exclamations like I'll never fly again especially on that airline What about I've had it with fast food restaurants Have you ever heard a student say I'll never take another course from that professor Or it's a great car but the service stinks What about He may be a great doctor but he treats all patients like they are not human So what do you do if you own or manage a small business and want to start off right That's an easy question You simply send new employees or even experienced ones to service school You've heard of computer school but have you heard of service school There are books on computer for example all over the place But you probably have never seen one a book that is about service Is an automobile dealership the same as a pharmacy At the service level you can bet they are This book will tell you all you need to know about providing great service Have you ever heard of a 2 hour seminar on how to give good service I bet you haven't Sometimes a manager will give suggestions but that is about it This book is a service resource Have you experienced a doctor's office that calls a patient concerning what time his or her appointment is Have you had a car dealer tell you they have lost your car Has a doctor operated on the wrong leg Maybe even the wrong person A service is a client provider interaction that creates and captures value for both participants We use service in several aspects of our lives including business government education health care and religion But what exactly are the best practices principles and theories of service The actual study of service is a relatively new field but it is one that can

This book is a collection of papers written by the author on the subject of service. They all have been peer reviewed and written for a diverse variety of reasons. Some papers have been modified to suit a general audience and others have simply been improved. There are some formatting differences due to the basic requirements of the various venues. The subject matter can be viewed as three separate sections: introductory, foundational, and applicative. The introductory papers are quite simple and give a gentle introduction to what the discipline of service is all about. The foundational papers provide a basis for the study of the concepts and methods of the service discipline. The applicative papers are general in nature so as to provide insight to what does and can go on in the world of service. Papers 1 and 2 fall into the first category. Papers 3, 4, and 5 are in the second category, and the remainder are in the third group. The table of contents is unique in that the entries give an abstract to the respective paper. This is an aid to a selection and gives a summary of the subject matter. The papers were assembled to support two recent books on the subject of service: Service and Advanced Technology Harry Katzan Jr., 2021-07-11. This book is a collection of essays on service and advanced technology written by the author and are based on peer reviewed papers presented at technical conferences. Service and advanced technology is the cornerstone of modern business and management and future developments in the various disciplines will be based on concepts presented herein. The essays can be easily be read by persons in all areas of business and management. Some of the papers have been modified to better suit a general audience and others have been simply improved. Titles and formatting have been adjusted in some cases. Some of the reasons for studying service and advanced technology are that the subjects serve as the bases of our everyday existence. We use service and technology on a daily basis yet we know very little about the underlying concepts. We have no introduction, no principles of best behavior, and no theories. It is time for a change. The reader is expected to read the essays individually and in any appropriate order. Accordingly, some of the introductory material is repeated. This fact is just part of the notion of presenting topics on a needed basis. The table of contents has been designed to better serve the reader. An entry gives an abstract to the respective essay and serves as an aid to the reader in selecting an essay of interest. The abstract entries serve to give a quick outline of the subject matter. The essays give a view of several areas of interest to the modern reader and cover the following subjects: Service concepts, Service management, Service technology, Hospitality, Cybersecurity, Service economics, Ransomware, Applied cybersecurity, Cybersecurity policy, Watchlist concepts, Identity, The ontology of identity, Service systems ontology, and Terrorism. Harry Katzan is a professor, author, and consultant and enjoys outdoor activities.
