

## Organizational Case Study

In order to assess your understanding of organizational theory and behavior, I ask that you complete a profile of a public organization of your choice, using three theoretical frameworks from our class to explain the behavior of the organization.

### *Choosing Your Organization*

The organization must be *public*; however—as we know—that definition is complicated. For the purposes of this assignment, you'll want to choose a governmental organization (traditional or hybrid).

Organization: Food and Drug Administration (FDA)

D.C based professional membership and advocacy organization for public health professionals in the US

I suggest that you select an organization that implements policy within an area of interest for you. By doing some preliminary research, you should consider how much information is available about your organization, how often it is discussed in popular media, etc.

### *Case Study Content Requirements*

Your case study should include the following sections:

- Description of the organization's history (how/why it was formed, individuals that were prominent in its formation, how the organization has evolved over time)

- Description of the organization's structure (using a graphic, here, could be useful)

- Description of the organization's mission (or mandates) and goals
