D. Sidney Potter,2017-01-16 The pathos of the 2008 Great Recession had a fairly wide sweep from minimum wage busboys to newspaper heiresses like Veronica Hearst to Federal Reserve chair Ben Bernanke whose childhood home was lost as a result of a relative not making timely mortgage paymentswherein all mentioned experienced some type of economic pain or at least embarrassment related to the Great Recession These episodes are captured in this

book as a way to bring a slight degree of levity to this economic catastrophe but to also underscore a serious juncture in American social and political theory as well. Author D. Sidney Potter, once a prolific real estate investor in the early to late part of the real estate boom that led to the bust, puts a spotlight on the real estate finance mortgage industry as once a lucrative insider to now a disenfranchised member and erstwhile benefactor. The irony of having to make his living as a mortgage operations professional who now examines the very mortgage financings that once bore his name does not go past him. His unabashed and sometimes crude essays examine the usual suspects from banker CEOs nascent political movements and professional legislators to the analytics of mortgage products that resulted in the self-inflicted implosion. Mr. Potter's collection of essays acts as a self-entombed time capsule that should be taken as a testimony of fact not fiction.

**In Search of Truth** DeLinda N. Baker, 2017-11-29 There is a surge of fake news overtaking media outlets in the twenty-first century. This stands in stark contrast to the unbiased objective truth. Integrity and truth seem to have become secondary to the desire to sensationalize and sway opinions. How do we respond to this overwhelming saturation of lies and false teachings? As Christians, we are uniquely positioned to know and represent truth as revealed by the one true God. First, we must look to the source of truth: God and his word. Second, we must be able to discern and recognize both truth and lies in what we are being told and in our culture. Third, we must become agents of truth: individuals who live, speak, and promote truth. Join us for a daily devotional as we explore scriptures that will guide us in our search for truth.

**Pseudology** Marcel Danesi, 2024-09-11 In an age where fake news, conspiracy theories, and outright lies by political and cultural leaders are commonplace, we may be becoming accustomed to lying or worse even immune to it. Pseudology unravels the reasons for this by describing a science of lying that looks at various aspects of this trait from how it affects the brain to how it distorts perception. Interest in lying goes back to antiquity and writing and debate has only increased in the present day, but what is missing is a treatment that synthesizes the work from linguists, political scientists, anthropologists, psychologists, neuroscientists, and sociologists, tying them to the philosophical and literary views of lying throughout history. Such a treatment can be called pseudology, an interdisciplinary science for classifying, collating, and assessing ideas about lying. This book is a comprehensive treatment of pseudology, emphasizing the importance of studying lying in our current climate. Pseudology addresses questions such as: What is a lie? Why do we lie? Why are we so susceptible to lying? How does lying activate false beliefs and generate hatred of others? How has lying shaped the course of history, at least to some extent? How has lying been adopted as a basic thematic element in literature and the arts? Synthesizing research from a broad range of disciplines and from the perspective of a leading cognitive linguist, this text weaves ideas and theories about lying cohesively into an overall interdisciplinary science. This landmark book is vital for students and scholars of language as well as anyone interested in politics, sociology, or psychology.
