Science Education Issues and Developments Calvin L. Petroselli, 2008 Science Education Issues and Developments **Astrobiology** Octavio A. Chon Torres, Ted Peters, Joseph Seckbach, Richard Gordon, 2021-10-12 ASTROBIOLOGY This unique book advances the frontier discussion of a wide spectrum of astrobiological issues on scientific advances space ethics social impact religious meaning and public policy formulation Astrobiology is an exploding discipline in which not only the natural sciences but also the social sciences and humanities converge Astrobiology Science Ethics and Public Policy is a multidisciplinary book that presents

different perspectives and points of view by its contributing specialists Epistemological moral and political issues arising from astrobiology convey the complexity of challenges posed by the search for life elsewhere in the universe We ask if a convoy of colonists from Earth make the trip to Mars should their genomes be edited to adapt to the Red Planet s environment If scientists discover a biosphere with microbial life within our solar system will it possess intrinsic value or merely utilitarian value If astronomers discover an intelligent civilization on an exoplanet elsewhere in the Milky Way what would be humanity s moral responsibility to protect Earth from an existential threat To treat other intelligences with dignity To exploit through interstellar commerce To conquer Audience The book will attract readers from a wide range of interests including astronomers astrobiologists chemists biologists space engineers ethicists theologians and philosophers

Astronomy Eric Chaisson, Stephen McMillan, 2007 A brief introductory astronomy book designed for readers with little or no scientific background A Beginner s Guide uses an exceptionally clear writing style The authors present a broad view of astronomy without complex mathematics yet the book discusses important concepts without simplification The book s organization follows the popular and effective Earth Out progression starting with our planet and then moving through the solar system A study of the Sun as a model star follows then the book covers the Milky Way Galaxy cosmology and the universe as a whole Because of its easy to read yet comprehensive coverage of astronomy this book can serve as excellent reference material for those readers interested in learning about our universe Personal Response System Through a partnership with Interwrite PRS this text is available with the PRS clicker system The Instructor Resource Center on CD ROM contains conceptual clicker questions in PowerPoint

Active Learning in College Science Joel J. Mintzes, Emily M. Walter, 2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman s 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these distinguished

scientists speak for themselves and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman s challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book s final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base For most students that knowledge base is riddled with a host of na ve notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for
