Douglas A. Lind,William G. Marchal,Samuel Adam Wathen,2008 European B2C E-Commerce in the Banking Sector Caroline Möckel,2010-04-28 Inhaltsangabe Introduction Based on the findings of the correlation analysis described in chapter 7 1 factors of influence and variables statistically not related to financial B2C e commerce can now be distinguished While the focus of this part of the analysis lies on factors showing significant correlation coefficients in relation to the research topic this does not mean that the non correlated factors are not of importance or somewhat connected The statistical measurements may not be suitable for this type of analysis survey results may be misleading or the situation will have changed in the last two years after the investigation On the other hand the observed correlations do not necessarily equal a causal relationship and the high complex matter can not be explained by single variables as influence factors The conducted correlation analysis only serves as an indicator for potential influence factors or accelerators and has to be carefully evaluated Keeping these considerations in mind the statistical analysis within the scope of this masters dissertation will support the following conclusions and interpretations First of all computer usage and skills as well as internet usage and skills need to be on a high level in a country to facilitate financial B2C e commerce Residents of countries with higher levels

for the subject of examination will probably already have gained adequate skills as indicated by a medium strong negative relation to computer courses taken in the last three months and other online activities such as online information search and online banking positively correlated While online banking is partially included in the variable e_comm representing financial B2C e commerce through customer s usage of online financial services this particular result may not be totally conclusive However it seems logical that consumers with good computer and internet skills also spending a lot of time with advanced activities on the internet may also engage in financial B2C e commerce This assumption narrows down the target group and excludes a certain clientele from online product offers of financial institutions banks will need to adapt their web portals accordingly set up initiatives improving computer and web skills of their consumers and meet their consumers on the internet e g with advertising while they are using search engines Practical evidence supporting these interpretations can be found in several examples of Process Analysis and Improvement: Text Marvin S. Seppanen,2005 **The SAGE Encyclopedia of Communication Research Methods** Mike Allen,2017-04-11 Communication research is evolving and changing in a world of online journals open access and new ways of obtaining data and conducting experiments via the Internet Although there are generic encyclopedias describing basic social science research methodologies in general until now there has been no comprehensive A to Z reference work exploring methods specific to communication and media studies Our entries authored by key figures in the field focus on special considerations when applied specifically to communication research accompanied by engaging examples from the literature of communication journalism and media studies Entries cover every step of the research process from the creative development of research topics and questions to literature reviews selection of best methods whether quantitative qualitative or mixed for analyzing research results and publishing research findings whether in traditional media or via new media outlets In addition to expected entries covering the basics of theories and methods traditionally used in communication research other entries discuss important trends influencing the future of that research including contemporary practical issues students will face in communication professions the influences of globalization on research use of new recording technologies in fieldwork and the challenges and opportunities related to studying online multi media environments Email texting cellphone video and blogging are shown not only as topics of research but also as means of collecting and analyzing data Still other entries delve into considerations of accountability copyright confidentiality data ownership and security privacy and other aspects of conducting an ethical research program Features 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats Although organized A to Z front matter includes a Reader s Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries Back matter includes a Chronology of the development of the field of communication research a Resource Guide to classic books journals and associations a Glossary introducing the terminology of the field and a detailed Index Entries conclude with References
