ECPPM 2021 - eWork and eBusiness in Architecture, Engineering and Construction Vitaly Semenov, Raimar J Scherer, 2021-07-25 *eWork and eBusiness in Architecture Engineering and Construction 2021* collects the papers presented at the 13th European Conference on Product and Process Modelling ECPPM 2021 Moscow 5-7 May 2021. The contributions cover a wide spectrum of thematic areas that hold great promise towards the advancement of research and technological development targeted at the digitalization of the AEC FM Architecture Engineering Construction and Facilities Management domains. High quality contributions are devoted to critically important problems that arise including Information and Knowledge Management, Semantic Web and Linked Data, Communication and Collaboration Technologies, Software Interoperability, BIM Servers and Product Lifecycle Management Systems, Digital Twins and Cyber Physical Systems, Sensors and Internet of Things, Big Data, Artificial and Augmented Intelligence in AEC, Construction Management, 5D nD Modelling and Planning, Building Performance Simulation, Contract Cost and Risk Management, Safety and Quality, Sustainable Buildings and Urban Environments, Smart Buildings and Cities, BIM Standardization Implementation and Adoption, Regulatory and Legal Aspects, BIM Education and Training, Industrialized Production, Smart Products and Services. Over the past quarter century, the biennial ECPPM conference series as the oldest BIM conference has provided researchers and practitioners with a unique platform to present and discuss the latest developments regarding emerging BIM technologies and complementary issues for their adoption in the AEC FM industry.

Structural Elements and Project Management in the Building Construction. Dr. A. Paul Makesh, 2025-08-30. The book *Structural Elements and Project Management in the Building Construction* is a guide to a person who deals with design of building and building construction activities. The field of Structural Engineering and Construction Management forms the backbone of modern infrastructure, blending scientific principles with managerial skills to create safe, efficient, and sustainable built environments. This book thesis is a culmination of my academic journey and professional experience spanning over a decade across institutions in India and abroad. Having had the privilege of teaching, researching, and working on various construction projects, I observed the growing need for an integrated understanding of structural design and project execution. While structural engineering ensures the strength and stability of buildings, construction management brings discipline, organization, and efficiency to project delivery. The synergy between these domains is critical to the success of any civil engineering project.
