

A detailed schematic diagram of a CMOS circuit, likely a differential pair or a similar analog block, rendered in white lines against a dark red background. The diagram shows two NMOS transistors at the bottom, connected to a common source, and two PMOS transistors at the top, connected to a common drain. The gates of the PMOS transistors are connected to the gates of the NMOS transistors, forming a differential pair. The output nodes are connected to a load network consisting of a resistor and a capacitor. The background features a grid of faint, light-colored circuit traces and arrows, suggesting a larger system or a design flow.
