

Coasting Theory Lectures Notes

Markus Hupfer and members of the team

September 7, 2024

These are the notes for the first lecture, *Foundations of Coasting Theory*. These are generalised and give insights on problems for all of the course parts. Some are generalised, while some are specific to the course, the latter contribution to Coasting Theory and the needs of students and their professionals at the University of Waterloo. I also used several other sources for additional materials such as Part II course book at Cambridge on Coasting Theory and Transportation given by Professor John White, and the other course notes from a Cambridge book on Subaqueous Transportation course given by Professor Tim Gattuso. I also included some from Bruce Turner's 1982 course, Applied Maths for the Civil Engineering, but not writing of the notes is based on Hugh Brinkley course notes, "Coastal Erosion Control".

All credits go to those who are not my fault.
