Watkins, 2015-11-22 Understand the essential principles of toxicology and how poisons affect the human body with this accessible and engaging summary. A Doody's Core Title for 2017. *General Principles of Toxicology: Disposition of Toxicants, Nonorgan Directed Toxicity, Target Organ Toxicity, Toxic Agents, Environmental Toxicology, Applications of Toxicology*. Casarett Doull's *Essentials of Toxicology* is an easy to absorb distillation of the major principles and concepts that were presented in depth in Casarett Doull's *Toxicology: The Basic Science of Poisons*, Eighth Edition, the field's gold standard text. Presented in full color, the book concisely describes the science of toxicology and includes important concepts from anatomy, physiology and biochemistry to facilitate the understanding of the principles and mechanisms of toxicant action on specific organ systems. A summary of key points at the beginning and review questions at the end of each chapter help you study, understand and memorize the material. Reflecting the expertise of more than sixty renowned contributors, Casarett Doull's *Essentials of Toxicology* is logically divided into seven sections. Succinct and comprehensive, there is no better text for gaining an understanding of essential principles, toxicokinetics, how toxic effects are passed on to succeeding generations, how each body system responds to poisons and the specific effects of a wide range of toxic agents than Casarett Doull's *Essentials of Toxicology*. *Environmental Health*, 1990. **Essentials of Environmental Health: A Public Health Perspective** Olivia Cunningham, 2021-11-16 The branch of public health that delves into an analysis of the different aspects of the natural and built environment to determine how they affect human health is termed as environmental health. The assessment and control of all environmental factors which have negative impact on human health as well as the creation of health conducive environments and prevention of disease are under the purview of this field. Some of the health concerns addressed within this field are air quality, climate change, food safety, waste disposal, biosafety, hazardous materials management etc. Such studies are collectively approached from the sub domains of environmental science, epidemiology, environmental and occupational medicine and toxicology. The book studies, analyzes and upholds the pillars of environmental health and its utmost significance in modern times. It picks up individual branches and explains their need and contribution in the context of this

area of study This book will prove to be immensely beneficial to students and researchers in this field
