With decades of hands-on experience conducting evaluations, the authors provide scores of examples to help students understand how evaluators deal with various critical issues. They include a glossary of key terms and concepts, making this the most comprehensive and authoritative evaluation text available. Thoroughly revised, the Seventh Edition now includes substantially more attention to outcome measurement. Lengthy discussions of program theory, including a section about detecting program effects and interpreting their practical significance. An augmented and updated discussion of major evaluation designs. A detailed exposition of meta-analysis as an approach to the synthesis of evaluation studies. Alternative approaches to evaluation. Examples of successful evaluations. Discussions of the political and social contexts of evaluation.

Coryn, widely considered experts in the evaluation field, introduce and describe 23 program evaluation approaches, including new to this edition: transformative evaluation, participatory evaluation, consumer feedback, and meta-analysis. Evaluation Theory Models and Applications Second Edition facilitates the process of planning, conducting, and assessing program evaluations. The highlighted evaluation approaches include Experimental and quasi-experimental design evaluations, Daniel L. Stufflebeam's CIPP Model, Michael Scriven's Consumer-Oriented Evaluation, Michael Patton's Utilization-Focused Evaluation, and Robert Stake's Responsive Stakeholder-Centered Evaluation. Evaluation Roots Marvin C. Alkin, 2012-04-12 *Evaluation Roots: A Wider Perspective of Theorists' Views and Influences* Second Edition provides an updated examination of current evaluation theories and traces their evolution. Marvin C. Alkin shows how theories build upon theories and how the theories are related to each other. The way in which these evaluation roots grew to form a tree helps to provide a better understanding of evaluation theory. In addition to the editor's overview, the book contains essays by leading evaluation theorists. In these pieces, the evaluators comment on their own development and give their views of their placement upon the tree. International Perspectives on Evaluation Standards Craig Russon, Gabrielle Russon, 2005-02-11 Prior to 1995, there were fewer than half a dozen regional and national evaluation organizations around the world. Today, there are more than fifty, attesting to a growing interest in the practice of program evaluation internationally.
