Probability and Statistics with Applications is an introductory textbook designed to make the subject accessible to college freshmen and sophomores concurrent with Calc II and III with a prerequisite of just one semester of calculus. It is organized specifically to meet the needs of students who are preparing for the Society of Actuaries qualifying Examination P and Casualty Actuarial Society's new Exam S. Sample actuarial exam problems are integrated throughout the text along with an abundance of illustrative examples and 870 exercises. The book provides the content to serve as the primary text for a standard two-semester advanced undergraduate course in mathematical probability and statistics. 2nd Edition Highlights: Expansion of statistics portion to cover CAS ST and all of the statistics portion of CAS S. Abundance of examples and sample exam problems for both Exams SOA P and CAS S. Combines best attributes of a solid text and an actuarial exam study manual in one volume. Widely used by college freshmen and sophomores to pass SOA Exam P early in their college careers. May be used concurrently with calculus courses. New or rewritten sections cover topics such as discrete and continuous mixture distributions, non-homogeneous Poisson processes, conjugate pairs in Bayesian estimation, statistical sufficiency, non-parametric statistics, and other topics also relevant to SOA Exam C.

**ACTEX Study Manual for SOA Exam C** Samuel A. Broverman, 2017

**Risk Models and Their Estimation** Stephen G. Kellison, Richard L. London, 2011. Much of actuarial science deals with the analysis and management of financial risk. In this text we address the topic of loss models traditionally called risk theory by actuaries, including the estimation of such models from sample data. The theory of survival models is addressed in other texts, including the ACTEX work entitled *Models for Quantifying Risk*, which might be considered a companion text to this one. In *Risk Models and Their Estimation* we consider as well the estimation of survival models in both tabular and parametric form from sample data. This text is a valuable reference for those preparing for Exam C of the Society of Actuaries and Exam 4 of the Casualty Actuarial Society. A separate solutions manual with detailed solutions to the text exercises is also available.
