The Executive's Guide to AI and Analytics Scott Burk,Gary D. Miner,2022-06-07 The Problem Companies are failing to deliver on AI and analytics with over half stating they are not yet treating data as a business asset Over half admit that they are not competing on data and analytics Seven out of 10 companies in a 2020 MIT study reported minimal or no impact from AI so far Among the 90% of companies that have made some investment in AI fewer than 2 out of 5 40% report business gains from AI in the past three years And only about 25% of organizations have actually forged this data driven culture Is investment lacking No Companies now are spending more than ever in data analytics and AI technologies Is it a lack of technology No There are fascinating breakthroughs occurring on all fronts with image voice and streaming pattern recognition on the forefront Is it a lack of technical talent Not really While some studies cite that we need to train more data scientists developers and related professionals the curve of demand by supply is dampening Is it a lack of creating an executable strategic plan Yes While there has been a lot of strategic wishing organizations lack meaningful strategic plans Specifically the development of executable strategies and the leadership to see these strategies brought to fruition This is the problem Lack of execution and lack of incorporating key components that align and enable execution of the business strategy to delivery is killing AI and analytics programs Scott Burk and Gary D Miner have written this book for executives at all levels who are charged with executing on analytics that need to address this issue The book provides unique insights into repairing the gaps that programs need to fill to provide value from analytics programs It complements their three part series It s All Analytics by focusing on leadership decisions that augment data literacy organizational architecture and AI case studies

HEALTHCARE's OUT SICK - PREDICTING A CURE - Solutions that WORK !!!! Gary D. Miner,Linda Miner,Darrell L. Dean,2019-01-04 The U S healthcare system is in complete chaos disarray Medical costs have increased significantly over the past 6 years with 70% increase for deductibles and 24% or more for health insurance premiums All the while workers earnings have either not increased or if they did the pay raises were for less than the increase in the cost of medical care The situation is unsustainable and the public wants the system fixed This book offers ways of fixing the problems in healthcare **HEALTHCARE s OUT SICK PREDICTING A CURE Solutions that WORK** first defines the healthcare in crisis problem Through real patient experiences the book describes the

difficulties of getting through the maze of complexity among the plethora of silo providers which make up the industry. The heart of the book provides readers with a comprehensive solution that can work a disruption that is necessary to provide Americans the medical care they need without the US public and healthcare providers and payors going into bankruptcy, insolvency or closure. This book delves into digitized medicine payor and provider reimbursement models and value based healthcare delivery. It also includes a philosophy or mode of thinking and operation for the solutions that are needed for diagnosis, effective cost effective and time efficient healthcare delivery of which digitized medicine value based care and payor reimbursement modes are just some of the factors. The authors propose that the real solution involves having the patient at the center of the issues and changing from an archaic gold standard way of thinking to a Predictive Analytic thinking where one gets at the real truth by doing real science that in the end becomes effective not only for the population but for the individual person. This all leads to real person centered and person directed medicine and healthcare delivery.
