Leckie,John E. Buschman,2008-11-30 In the last 15 years the ground both in terms of technological advance and in the sophistication of analyses of technology has shifted At the same time librarianship as a field has adopted a more skeptical perspective libraries are feeling market pressure to adopt and use new innovations and their librarians boast a greater awareness of the socio cultural economic and ethical considerations of information and communications technologies Within such a context a fresh and critical analysis of the foundations and applications of technology in librarianship is long overdue

The Management Process: Theory, Research, and Practice John B. Miner,1973 A Process Theory of Organization Tor Hernes,2014-05-15 This book presents a novel and comprehensive process theory of organization applicable to a world on the move where connectedness prevails over size flow prevails over stability and temporality prevails over spatiality The framework developed in the book draws upon process thinking in a number of areas including process philosophy pragmatism phenomenology and science and technology studies Salient ideas from these schools are carefully woven into a process theory of organization which makes the book not only a thought provoking theoretical contribution but also a much needed glimpse into the challenges of organizing in a complex and moving world Taking a distinctly temporal view of organizational life the author shows how actors continually carve out their temporal existence from being in the flow of time This on going work in which technologies concepts and social actors take part is crucial for the making of any type of organizational formation A key construct of the book is that of events which provide force movement and historicity to
