Security Issues of Big Data Hadoop Rohit Sharma,2018-03-05 Scientific Essay from the year 2018 in the subject Computer Science IT Security grade 2 language English abstract In this we discuss security issues for big data Hadoop environment Big data applications are a great benefit to organization business and in many small and large scale industries Security and privacy issues are magnified by velocity variety and volume of big data Hadoop projects security as top agenda which in turn represents classified as critical term With the increasing acceptance of Hadoop there is increasing trend to create a vast security feature Therefore a traditional security mechanism which are tailored to securing a small scale static data are in adequate The important issues relating to Hadoop are authentication authorization editing and encryption within a cluster In this paper we have highlighted different security aspects of big data Hadoop

Big Data and Data Science Dhaanyalakshmi Ahuja,2025-01-03 Big Data and Data Science Analytics for the Future dives into the fundamentals of big data and data science We explain the data science life cycle and its major components such as statistics and visualization using various programming languages like R As technology evolves the significance of data science and big data analytics continues to grow making this field increasingly important Our book is designed in a reader friendly manner targeting newcomers to data science Concepts are presented clearly and can be easily implemented through the procedures and algorithms provided As data collection multiplies exponentially analytics remains an evolving field with vast career opportunities We cater to two types of readers those skeptical about the benefits of big data and predictive analytics and enthusiasts keen to explore current applications of these technologies Big data is a fantastic choice for launching a career in IT and this book equips you with the knowledge needed to succeed We cover a broad spectrum of topics ensuring a strong foundation in data science and big data analytics

Understanding Cybersecurity Law in Data Sovereignty and Digital Governance Melissa Lukings,Arash Habibi Lashkari,2022-10-14 This book provides an overview of the topics of data sovereignty and governance with respect to data and online activities through a legal lens and from a cybersecurity perspective This first chapter explores the concepts of data ownerships and privacy with respect to digital

media and content before defining the intersection of sovereignty in law with application to data and digital media content. The authors delve into the issue of digital governance as well as theories and systems of governance on a state level, national level, and corporate/organizational level. Chapter three jumps into the complex area of jurisdictional conflict of laws and the related issues regarding digital activities in international law, both public and private. Additionally, the book discusses the many technical complexities which underlay the evolution and creation of new law and governance strategies and structures. This includes socio-political, legal, and industrial/technical complexities which can apply in these areas. The fifth chapter is a comparative examination of the legal strategies currently being explored by a variety of nations. The book concludes with a discussion about emerging topics which either influence or are influenced by data sovereignty and digital governance, such as indigenous data sovereignty, digital human rights, and self-determination, artificial intelligence, and global digital social responsibility. Cumulatively, this book provides the full spectrum of information from foundational principles underlining the described topics through to the larger, more complex, evolving issues which we can foresee ahead of us.

Recent Trends in Image Processing and Pattern Recognition K. C. Santosh, Ravindra S. Hegadi, 2019-07-16. This three-book set constitutes the refereed proceedings of the Second International Conference on Recent Trends in Image Processing and Pattern Recognition (RTIP2R 2018) held in Solapur, India, in December 2018. The 173 revised full papers presented were carefully reviewed and selected from 374 submissions. The papers are organized in topical sections in the three volumes: Part I: computer vision and pattern recognition, machine learning and applications, and image processing; Part II: healthcare and medical imaging, biometrics and applications; Part III: document image analysis, image analysis in agriculture and data mining, information retrieval and applications.

Harnessing Cloud Computing to Redefine Banking IT Operations for Scalable and Secure Systems Sapana Garud, 2025-02-18. The growth of high-speed networks and computing power is making it possible to process different banking services or applications in microseconds, undreamed of in the past. These rapid explosions of technology are changing the banking industries from paper and branch banks to digitized and networked banking services. Wakeham (2010) notes that delivering banking services on this networked environment are more convenient and effective than ever before. Expanding the geographical coverage of digitized and networked banking services are the mainstays for banks to deliver QoS to customers. NBE (2012) notes that in developing countries, the cost of expanding the geographical coverage of digitized and networked banking services to customers would be difficult for a single bank. In this environment, banks would start to collaborate to pool non-differentiated activities using private cloud computing within a closed group of banks in a similar way to telecommunication sharing network infrastructure. Sardet (2012) notes that these bundling could provide shared services that interact with customers in more engaging ways while simultaneously freeing banks from the burden of routine transactions. Thus, when the transaction volumes decline, this collaboration could enable banks to stop duplicating investment, industrialize their security processes, for economies of scale, gain new service options, and have immediate access to the latest apps. These

collaborative private clouds could even be hybrid cloud powered by a third party increasing the benefits of cost and flexibility

Big Data Security Paul M. Wright,2018-06 Big data security enables products like Hadoop to provide new knowledge in a secure fashion Big data brings together many previously separate units of data that were partially

secured by their host's technical inability to share that data seamlessly. The potential for data breach in a big data solution is huge. New processes and technology solutions are needed to enable sensitive data to be brought together safely, allowing differential privacy while simultaneously providing new knowledge from the aggregated results. This practical book shows how to protect Hadoop data from unauthorized access and limit the ability of an attacker to corrupt or modify data in the event of a security breach.
