Nature-Inspired Intelligent Techniques for Solving Biomedical Engineering Problems Kose, Utku, Guraksin, Gur Emre, Deperlioglu, Omer, 2018-03-31 Technological tools and computational techniques have enhanced the healthcare industry These advancements have led to significant progress and novel opportunities for biomedical engineering Nature Inspired Intelligent Techniques for Solving Biomedical Engineering Problems is a pivotal reference source for emerging scholarly research on trends and techniques in the utilization of nature inspired approaches in biomedical engineering Featuring extensive coverage on relevant areas such as artificial intelligence clinical decision support systems and swarm intelligence this publication is an ideal resource for

medical practitioners professionals students engineers and researchers interested in the latest developments in biomedical technologies

Applied Intelligence for Medical Image Analysis Aarti,Raju Pal,Mukesh Saraswat,Himanshu Mittal,2024-07-05 Over the last decades there has been a revolution in the use of new intelligent technologies to analyze and interpret medical images for diseases diagnosis assessment ad treatment This new volume explores the latest cutting edge research in medical image analysis The advanced intelligent technologies discussed include machine learning ensemble methods in machine learning deep learning methods and firebase technology infrared thermography deep convolution neural networks and more Some of the specific uses of these technologies include for brain tumor MRIs for breast cancer screening for polycystic ovary syndrome classification for detecting and monitoring Alzheimer s disease for monitoring of newborns for retinal disease diagnosis for Covid 19 detection and more

Computational and Statistical Methods for Analysing Big Data with Applications Shen Liu,James MCGree,Zongyuan Ge,Yang Xie,2015-11-20 Due to the scale and complexity of data sets currently being collected in areas such as health transportation environmental science engineering information technology business and finance modern quantitative analysts are seeking improved and appropriate computational and statistical methods to explore model and draw inferences from big data This book aims to introduce suitable approaches for such endeavours providing applications and case studies for the purpose of demonstration Computational and Statistical Methods for Analysing Big Data with Applications starts with an overview of the era of big data It then goes onto explain the computational and statistical methods which have been commonly applied in the big data revolution For each of these methods an example is provided as a guide to its application Five case studies are presented next focusing on computer vision with massive training data spatial data analysis advanced experimental design methods for big data big data in clinical medicine and analysing data collected from mobile devices respectively The book concludes with some final thoughts and suggested areas for future research in big data Advanced computational and statistical methodologies for analysing big data are developed Experimental design methodologies are described and implemented to make the analysis of big data more computationally tractable Case studies are discussed to demonstrate the implementation of the developed methods Five high impact areas of application are studied computer vision geosciences commerce healthcare and transportation Computing code programs are provided where appropriate

Inventive Communication and Computational Technologies G. Ranganathan,Xavier Fernando,Álvaro Rocha,2022-11-13 This book gathers selected papers presented at the Inventive Communication and Computational Technologies Conference ICICCT 2022 held on May 12 13 2022 at Gnanamani College of Technology Tamil Nadu India The book covers the topics such as Internet of Things social networks mobile communications big data analytics bio inspired computing and cloud computing The book is exclusively intended for academics and practitioners working to resolve practical issues in this area

The "Minnesota Code" for ECG classification ,1967 **ECG Signal Processing, Classification and Interpretation** Adam Gacek,Witold Pedrycz,2011-09-18 The book shows how the

various paradigms of computational intelligence employed either singly or in combination can produce an effective structure for obtaining often vital information from ECG signals. The text is self contained addressing concepts methodology algorithms and case studies and applications providing the reader with the necessary background augmented with step by step explanation of the more advanced concepts. It is structured in three parts. Part I covers the fundamental ideas of computational intelligence together with the relevant principles of data acquisition morphology and use in diagnosis. Part II deals with techniques and models of computational intelligence that are suitable for signal processing and Part III details ECG system diagnostic interpretation and knowledge acquisition architectures. Illustrative material includes brief numerical experiments detailed schemes exercises and more advanced problems.
