

## Grape Yield Per Acre.

In Italia, the grape tree has become one of the most profitable crops for years. However, in recent decades, the productivity and competitiveness of the Italian grapes have been reduced because of increasing production costs and the scarcity of labor. In order to evaluate the harvest quality in this sector of Italy, the Italian Grape Association would like to compare the grape production of competitive European countries. The following figure illustrates the average grape yield per acre of France, Spain, Italy and UK from 1400 to 2000.

## QUESTIONS

Refer to the figure above, which of the following statements, if true, MOST correctly explains the reason for different average grape yield per acre of France, Spain, Italy and UK from 1400 to 2000?

A. The number of Europeans immigrating to other continents has been increasing since 1400.

B. There was an early industrial revolution in grape horticulture in France.

C. The size of UK population has become larger.

D. The development of international trade over the world has brought France, Spain, Italy and UK into being grape exporters.

Exhibit 1

Where grape yield per acre or grape crop yield measures the yield of a grape per unit area (acre) of land cultivation.
